Attack Politics Michael Pfau, Henry C. Kenski, 1990 In a timely contribution to the political communication and U S politics literature Pfau and Kenski trace the nature and growth of political attack messages through the 1988 election As the authors note at the outset political attack messages have grown more and more popular in contemporary political advertising in large part because research indicates that attack messages are extremely effective in influencing voters The authors examine the various attack strategies both generally and as applied in specific campaigns and then focus on responses to political attacks Particular attention is given to the resistance strategy of inoculation which the authors argue is one of the few viable strategic defenses available to candidates who find themselves under attack In addition to reviewing early laboratory research on inoculation the authors present the results of two large experimental field studies one involving a Senate campaign in 1986 the other the 1988 presidential campaign which represent the first tests of inoculation in a political campaign context Following an overview of the historical role played by attack messages in American politics the authors examine the rapid growth of attack politics during the Reagan era culminating in the 1988 election They demonstrate the inadequacies of existing and proposed options

for limiting the use of attack messages in political campaigns arguing that the judiciary's support for unfettered political expression combined with the perception among campaign professionals that attack strategies are an important and effective option mitigate against any decrease in their use. The authors also point out the inadequacies inherent in present defenses against attack messages: the preemptive attack, the refutation strategy, and the counterattack strategy. Turning to a consideration of the inoculation message strategy, Pfau and Kenski present an extended discussion of the results of the 1986 and 1988 field studies. The findings indicate that inoculation messages deflect the persuasiveness of subsequent attack messages that might be launched by an opponent during a campaign, thereby reducing the likelihood that political attacks will influence either receiver attitudes about candidates or actual receiver votes. Both political scientists and political campaign professionals will find *Attack Politics* enlightening and provocative reading.
