Debates Of Our Times Class Inequality:

Social Inequality in a Global Age Scott Sernau, 2016-05-04 This updated Fifth Edition of Scott Sernau's acclaimed text provides a sociological framework for analyzing inequality within the United States in the context of global stratification and a rapidly changing world economy. With insightful analysis, the text provides an accessible introduction to stratification systems and the structural and personal realities of growing class divides. Using examples drawn straight from today's headlines, Sernau explores each dimension of inequality as he analyzes the relationship between changing global power and growing inequalities within countries. Throughout, a focus on social action and community engagement encourages students to become involved active learners in the classroom and engaged citizens in their communities.

Time and Poverty in Western Welfare States Lutz Leisering, Stephan Leibfried, 1999 *Time and Poverty in Western Welfare States* is the English language adaptation of one of the most important contributions to welfare economics published in recent years. Professors Leibfried and Leisering offer a time-based dynamic analysis of the study of poverty and suggest the need for a radical rethink of conventional theoretical and policy approaches. The core of this study is the empirical analysis of the life course of recipients of Social Assistance in Germany, although the conclusions are put into a wider context of socio-economic and socio-political analysis and comparative observations are made with other countries, notably the USA. *Time, Life and Poverty* will be of interest to upper-level students, researchers, and policy makers in a wide range of social science disciplines including economics, social policy, sociology, psychology, and European studies.

Televised Presidential Debates in a Changing Media Environment Edward A. Hinck, 2018-11-26 This two-volume set examines recent presidential and vice-presidential debates, addresses how citizens make sense of these events in new media, and considers whether the evolution of these forms of consumption is healthy for future presidential campaigns and for democracy. The presidential debates of 2016 underscored how television highlights candidates and campaigns' messages, which provide fodder for citizens' widespread use of new media to talk back to campaigns and other citizens. Social media will continue to affect the way that campaign events like presidential debates are consumed by audiences and how they shape campaign outcomes. This two-volume study is one of the first to examine the relationship between debates as televised events and events consumed by citizens through social media. It also assesses the town hall debate format from 1992 to 2016, uses the lens of civil dialogue to consider how citizens watch the debates, and considers the growing impact of new media commentary on candidate images that emerge in presidential and vice-presidential debates. *Televised Presidential Debates in a Changing Media Environment* features contributions from leading political communication scholars that illuminate how presidential debates are transforming from events that are privately contemplated by citizens to events that are increasingly viewed and discussed by citizens through social media. The first volume focuses on traditional studies of debates as televised

campaign events and the second volume examines the changing audiences for debates as they become consumed and discussed by viewers outside the traditional channels of newspapers cable news channels and campaign messaging Readers will contemplate questions of new forms problems and possibilities of political engagement that are resulting from citizens producing and consuming political messages in new media
