Decentralization Of Education Legal Issues:

Decentralization of Education Ketleen Florestal, Robb Cooper, 1997-01-01 In practice most education systems have both centralized and decentralized elements. Planners involved in a decentralizing reform must identify which components of the system are more appropriately managed at the central level and which at the local level. This book is intended to inform education policymakers, planners, and practitioners about international experience in the legal aspects of decentralizing basic education. It also provides a basic understanding of how laws and regulations can be used for education reform. For purposes of the discussion, decentralization is used to describe efforts to transfer decision making power in basic education from the administrative center of a country to authorities closer to users. The term is also used in a more technical sense to describe one of the many forms this type of reform can take, and in this sense it is contrasted with deconcentration and devolution as educational reforms. The first section examines the general legal aspects of decentralization, and the second looks more closely at decentralization laws and regulations. The third section is in effect a checklist of items that should be included in decentralization laws, and the fourth section provides a road map to help the planner prepare and implement the laws required for reform. Although an effort has been made to keep the discussion general enough for use in many countries, the analysis is based on the legal systems of the Western world or those that they inspired. Education Strategy in the Developing World Christopher S. Collins, Alexander W. Wiseman, 2012-03-06 Following the development of a Concept Note for the World Bank Education Strategy 2020, the World Bank engaged in a series of activities to garner feedback about the strategy. In early 2011, a revised strategy was published: *Learning for All: Investing in People's Knowledge and Skills to Promote Development*. This title deals with this topic. *Resources in Education*, 1998. *Case Studies on Educational Administration* Theodore J. Kowalski, 2005. This book immerses prospective administrators in the realities of practice and decision making through the use of a wide range of open-ended case studies. Effective practice in school administration involves making decisions about school management and reform, including issues such as state deregulation, district decentralization, and school restructuring. Leaders need to think beyond management and consider how to affect school culture, professional development, and changing populations. The cases in this book will help leaders address those issues by sharpening three key skills: 1. How to identify and solve problems; 2. How to develop and evaluate alternative solutions; 3. How to continuously refine professional knowledge. New to this edition: Worksheets are now provided for each case to allow instructors greater flexibility for use. More emphasis on entry-level positions: assistant principal and principal. Provides a broader perspective on school leadership. New cases for institutions such as vocational schools and alternative schools have been added to reflect the options that are available today with school choice. The cases have been thoroughly revised and updated to cover a range of current problems in practice so that new administrators will recognize the situations and understand how decisions can be applied. A new case dealing with No Child Left Behind Legislation has been added to
