Cartographies of Exile Karen Elizabeth Bishop, 2016-04-20 This book proposes a fundamental relationship between exile and mapping. It seeks to understand the cartographic imperative inherent in the exilic condition: the exilic impulses fundamental to mapping and the varied forms of description proper to both. The vital intimacy of the relationship between exile and mapping compels a new spatial literacy that requires the cultivation of localized dynamic reading practices attuned to the complexities of understanding space as text and texts as spatial artifacts. The collection asks what kinds of maps do exiles make. How are they conceived, drawn, read? Are they private maps or can they be shaped collectively? What is their relationship to memory and history? How do maps provide for new ways of imagining the fractured experience of exile and offer up both new strategies for reading displacement and new displaced reading strategies? Where does exilic mapping fit into a history of cartography, particularly within the twentieth-century spatial turn? The original work that makes up this interdisciplinary collection presents a varied look at cartographic strategies employed in writing, art, and film from the pre-Contact Americas to the Renaissance to late postmodernism: the effects of exile in its many manifestations on cartographic textual systems; ways of seeing and forms of reading; the challenges of traversing and mapping unstable landscapes and restrictive social and political networks; and the felicities and difficulties of both giving into the map and attempting to escape the map that provides for exile in the first place. *Cartographies of Exile* will be of interest to students and scholars working in literary and cultural studies, gender, sexuality, and race studies, anthropology, art history, and architecture, film, performance, visual studies, and the fine arts.

Breaking the Maya Code (Third Edition) Michael D. Coe, 2012-02-27 The inside story of one of the great intellectual breakthroughs of our time: the first great decipherment of an ancient script, now revised and updated. In the past dozen years, Maya decipherment has made great strides in part due to the Internet, which has made possible the truly international scope of hieroglyphic scholarship: glyphic experts can be found not only in North America (Mexico, Guatemala) and western Europe but also in Russia and the countries of eastern Europe. The third edition of this classic book takes up the thorny question of when and where the Maya script first appeared in the archaeological record and describes efforts to decipher its meaning on the extremely early murals of San Bartolo. It includes iconographic and epigraphic investigations into how the Classic Maya perceived and recorded the human senses, a previously unknown realm of ancient Maya thought and perception. There is now compelling documentary and historical evidence bearing on the question of why and how the breaking of the Maya code was the achievement of Yuri V. Knorozov, a Soviet citizen totally isolated behind the Iron Curtain, and not of the leading Maya scholar of his day, Sir Eric Thompson. What does it take to make such a breakthrough with a script of such complexity as the Maya? We now have some answers, as Michael Coe demonstrates here.
