Decision Making In Criminal Justice Toward The Rational Exercise Of Discretion:

Decision Making in Criminal Justice Michael R. Gottfredson, Don M. Gottfredson, 2013-11-11 The study of decisions in the criminal justice process provides a useful focus for the examination of many fundamental aspects of criminal justice. These decisions are not always highly visible. They are made or primarily within wide areas of discretion. The aims of the decisions are not always clear and indeed the principal objectives of these decisions are often the subject of much debate. Usually they are not guided by explicit decision policies. Often the participants are unable to verbalize the basis for the selection of decision alternatives. Adequate information for the decisions is usually unavailable. Rarely can the decisions be demonstrated to be rational. By a rational decision we mean that decision among those possible for the decisionmaker which in the light of the information available maximizes the probability of the achievement of the purpose of the decisionmaker in that specific and particular case. Wilkins 1974a: 70 also 1969. This definition which stems from statistical decision theory points to three fundamental characteristics of decisions. First it is assumed that a choice of possible decisions or more precisely of possible alternatives is available. If only one choice is possible there is no decision problem and the question of rationality does not arise. Usually of course there will be a choice even if the alternative is to decide not to decide a choice that of course often has profound consequences.

Encyclopedia of Criminology J. Mitchell Miller, Richard A. Wright, 2013-12-17 This three volume work offers a comprehensive review of the pivotal concepts, measures, theories and practices that comprise criminology and criminal justice. No longer just a subtopic of sociology, criminology has become an independent academic field of study that incorporates scholarship from numerous disciplines including psychology, political science, behavioral science, law, economics, public health, family studies, social work and many others. The three volume Encyclopedia of Criminology presents the latest research as well as the traditional topics which reflect the field's multidisciplinary nature in a single authoritative reference work. More than 525 alphabetically arranged entries by the leading authorities in the discipline comprise this definitive international resource. The pivotal concepts, measures, theories and practices of the field are addressed with an emphasis on comparative criminology and criminal justice. While the primary focus of the work is on American criminology and contemporary criminal justice in the United States, extensive global coverage of other nations' justice systems is included and the increasing international nature of crime is explored thoroughly. Providing the most up to date scholarship in addition to the traditional theories on criminology, the Encyclopedia of Criminology is the essential one stop reference for students and scholars alike to explore the broad expanse of this multidisciplinary field.
