Decision Making In The Workplace A Unified Perspective:

Decision Making in the Workplace Lee Roy Beach, 2014-03-05 Many if not most of one's important decisions are made in the context of one's work. However, because workplace decisions cover such a broad range of issues, it often is difficult to detect underlying commonalities in how they are made and in how things go wrong when they do go wrong. As a result, there are nearly as many different descriptions of workplace decisions as there are decisions themselves. In this volume, the best features of these diverse descriptions are unified in a new intuitively compelling view of decision making called Image Theory. The result is a clear picture of real-life day-to-day workplace decision making that allows us to think constructively about how such decisions are made and about how to improve them when improvement is necessary. [The Psychology of Decision Making](#) Lee R. Beach, Terry Connolly, 2005-01-05 The Psychology of Decision Making provides an overview of decision making as it relates to management, organizational behavior, issues, and research. This engaging book examines the way individuals make decisions as well as how they form judgments privately and in the context of the organization. It also discusses the interplay of group and institutional dynamics and their effects upon the decisions made within and on the behalf of organizations. *Image Theory* Lee Roy Beach, 1998 will compliment Beach's book Decision Making and sell in management and industrial organizational programs. **Great Minds in Management** Ken G. Smith, Michael A. Hitt, 2005-09-22 In Great Minds In Management Ken G. Smith and Michael A. Hitt have brought together some of the most influential and original thinkers in management. Their contributions to this volume not only outline their landmark contributions to management theory but also reflect on the process of theory development, presenting their own personal accounts of the gestation of these theories. The result is not only an ambitious and original panorama of the key ideas in management theory presented by their originators but also a unique collection of reflections on the process of theory development, an area which to date little has been written about by those who have actually had experience of building theory. In their concluding chapter, Ken G. Smith and Michael A. Hitt draw together some common themes about the development of management theory over the last half a century and suggest some of the conclusions to be drawn about how theory comes into being. [Organizational Behavior](#) John B. Miner, 2002 The book begins with a treatment of the role of science and the nature of theory and research. A discussion of the early origins and history of organizational behavior follows. This is the most comprehensive coverage of how organizational behavior emerged and grew. It presents and evaluates the first generation theorists whose work began during the first 20 years. The subject matter covered is motivation, leadership, and organizational decision making. The institutional culture of organizational behavior is discussed, and a vision for the future of the field is stated. Here, the early history and the evidence from the theories are brought together in an effort to assess the identity of organizational behavior and where it might be headed. [Spoilt for Choice: How senior managers select professional advisors](#) Wienke Seeger, 2019-11-04 How do senior executives such as CEOs and CFOs interact, select, and appoint professional advisors? Based on a successful PhD project

the research in this book explores the interactions between advisors of large professional service firms and senior executive clients on an evidence based academic level The research journey and the author s reflections are charted step by step providing an example of how to analyse unstructured qualitative data reach theoretical saturation and capture emerging substantive theories Moreover by taking a unique holistic and inductive approach this study offers a series of practical insights on how to combine and apply Kathy Charmaz constructivist grounded theory with an auto ethnographic stance Divided into eight chapters the author uses empirical data and rigorous analysis to uncover two distinct decision making processes namely a the client s decision to develop and maintain a relationship with the advisor and b to select and appoint the advisor for a particular project or services Mapping these to one common conceptual framework a second complementary model emerges a type of decision making matrix with the foci competitiveness skills and merit continuity and embeddedness control and manage and trust and empathy which offers the reader an alternative perspective of client decision making This book will be useful for practitioners and researchers alike who have an interest in understanding either naturalistic decision making processes the complexities of relationship development and procurement dynamics as well as applied qualitative research methods

The Psychology of Decision-Making Lee Roy Beach,1997-03-28 Beach looks at how individuals make decisions both privately and in the context of the organisation analysing the interplay of group and institutional dynamics and their effects upon the decisions made within and on behalf of organisations
