Decisionmaking For Arms Limitation Assessments And Prospects:

Decisionmaking for Arms Limitation Hans Günter Brauch, Duncan L. Clarke, 1983 Do Institutions Matter? R. Kent Weaver, Bert A. Rockman, 2010-12-01 As a stunning tide of democratization sweeps across much of the world countries must cope with increasing problems of economic development political and social integration and greater public demand of scarce resources That ability to respond effectively to these issues depends largely on the institutional choices of each of these newly democratizing countries With critics of national political institutions in the United States arguing that the American separation of powers system promotes ineffectiveness and policy deadlock many question whether these countries should emulate American institutions or choose parliamentary institutions instead The essays in this book fully examine whether parliamentary government is superior to the separation of powers system through a direct comparison of the two In addressing specific policy areas such as innovation and implementation of energy policies after the oil shocks of 1970 management of societal cleavages setting of government priorities in budgeting representation of diffuse interest in environmental policy and management of defense forces the authors define capabilities that allow governments to respond to policy problems Do Institutions Matter includes case studies that bear important evidence on when and how institutions influence government effectiveness The authors discover a widespread variation among parliamentary systems both in institutional arrangements and in governmental capabilities and find that many of the failings of policy performance commonly attributed to American political institutions are in fact widely shared among western industrial countries Moreover they show how American political institutions inhibit some government capabilities while enhancing others Changing American institutions to improve some aspects of governmental performance could hurt other widely valued capabilities The authors draw important guidelines for institutional reformers while emphasizing that institutions do have predictable risks and opportunities They caution that a balance between such risks and opportunities must first be reached before policy reformers try to change political institutions **The Nuclear Non-proliferation Treaty** Ian Bellany, Coit D. Blacker, Joseph Gallacher, 2014-05-01 This study looks at the interpretations and effects of the Nuclear Non Proliferation Treaty and offers readings of its possible future effects **Bulletin of the Atomic Scientists** , 1983-06 **Soviet Foreign Policy in a Changing World** Robbin F. Laird, Erik P. Hoffmann, 2021-03-22 No detailed description available for Soviet Foreign Policy in a Changing World **The Last Great Nuclear Debate** T. Halverson, 1995-11-20 Fundamental changes in international relations during 1989 90 toppled the pillars of the security policy paradigm which had characterised the Cold War That convulsion swept aside the last of many nuclear debates to rend NATO Immediately the nuclear problems which had plagued the 1980s were tossed aside Yet many important and interesting elements of the decade s nuclear history had not been fully explained With the nuclear issue s rapid shift to irrelevancy previously hidden information on the period became at once less secret and more easily available Thus through extensive interviews with participants and careful analysis of open sources

missing parts of the puzzle emerged This book is intended to provide a fuller explanation of NATO's last great nuclear debate
