Deconstruction in Architecture A. Papadakēs, 1988 **The Last Fortress of Metaphysics** Francesco Vitale, 2018-02-01 Examines the relationship of Derrida's writings on architecture to his methodology of deconstruction and to deconstructivism in architecture Between 1984 and 1994 Jacques Derrida wrote and spoke a great deal about architecture both in his academic work and in connection with a number of particular building projects around the world He engaged significantly with the work of architects such as Bernard Tschumi Peter Eisenman and Daniel Libeskind Derrida conceived of architecture as an example of the kind of multidimensional writing that he had theorized in *Of Grammatology* identifying a rich common ground between architecture and philosophy in relation to ideas about political community and the concept of dwelling In this book Francesco Vitale analyzes Derrida's writings and demonstrates how Derrida's work on this topic provides a richer understanding of his approach to deconstruction highlighting the connections and differences between philosophical deconstruction and architectural deconstructivism Although there has been some discussion of the intersection of deconstruction and architecture in the past mostly among architects and architectural critics Vitale's work is distinguished by the fact that it is written by a true philosopher who has a much more acute sense than has usually been the case of the philosophical underpinnings of Derrida's exchanges with Tschumi Eisenman and others Vitale is throughout concise precise insightful and often brilliant Geoffrey Bennington author of *Interrupting Derrida* *Anti-architecture and Deconstruction* Nikos Angelos Salingaros, 2004 The Emperor Has No Clothes is an old adage but in the sad case of Deconstructivism it is absolutely appropriate as Deconstructivism is really nothing more than Modernism in a new guise Modernists notably the Bauhaus aimed for the clean slate jettisoning everything that went before Yet at times they claimed links with antecedents to give a spurious historical ancestry to their aims and creations These questionable links and precedents are now being claimed for the works of Deconstructivists by sympathetic architects and their supporters **Deconstruction II**, 1989

The Architecture of Deconstruction Mark Wigley, 1993 By locating the architecture already hidden within deconstructive discourse Wigley opens up more radical possibilities for both architecture and deconstruction

Deconstruction in Architecture, 1994 **Deconstructivist Architecture** Philip Johnson, Mark Wigley, 1988 This book reveals a new sensibility in architecture exemplified by the projects of seven contemporary architects The designs represent the independent efforts of radically different architects who are creating provocative sometimes disquieting works by exploiting the hidden potentials and dilemmas within modern architecture 150 black and white illustrations

Deconstruction Omnibus A. Papadakēs, C. Cook, Andrew Benjamin, 1989-01-15 Deconstruction in architecture and the visual arts is defined by writings and projects from around the world Four sections present the work of major contributors such as Jacques Derrida Peter Eisenman Valerio Adamo Bernard Tschumi Daniel Libeskind and many more This book is an invaluable contribution to our understanding of all of one of the most talked about developments in art and architecture

today Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl Avery Library,1993 **Deconstruction III** A.
