Contemporary Continental Philosophy Stuart Sim, 2017-08-03 This title was first published in 2000 Contemporary continental philosophy is a widely used but in many ways a highly problematic term and its exact frame of reference is not always clear In its more recent French manifestations in particular it continues to arouse considerable controversy and create bitter divisions with particularly hostile reactions to the work of Derrida and others Much work in the recent continental tradition can be fitted into a longer running philosophical tradition of scepticism and scepticism has always had the power to provoke and unsettle the philosophical establishment Presenting an overview of the philosophical landscape of the continental tradition since the 1940s this book traces the establishment of the new super scepticism as an intellectual paradigm with the power to threaten and disorientate existing world views and more traditional styles of philosophical discourse marking the continental divide Exploring how contemporary continental philosophy from existentialism to postmodernism can be characterised as this new more resistant form of scepticism Sim identifies a clutch of key themes including difference the subject antifoundationalism dialectics which have been obsessively worked over by key thinkers in the Existentialist Postmodernist period and demonstrates how these have contributed to the development of a super sceptical outlook Presenting a new theme led approach to provide an entry into current debates in continental philosophy Stuart Sim reintegrates the work of Sartre into the more recent continental tradition and suggests that something qualitatively different is now occurring in French philosophy

The History of Continental Philosophy Alan D. Schrift, 2013-04-12 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive

The History of Continental Philosophy, 2010 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume History of Continental Philosophy will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant s philosophy and its initial reception the History traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment

Analytic versus Continental James Chase, Jack Reynolds, 2011-01-01 A clarifying examination of the differences and similarities between two philosophical schools

Contemporary Continental Philosophy Robert D'Amico, 2018 Contemporary Continental Philosophy steps back from current debates comparing Continental and analytic philosophy and carefully yet critically outlines the tradition s main philosophical views on epistemology and ontology Forgoing obscure paraphrases D Amico provides a detailed clear account and assessment of the tradition from its founding by Husserl and Heidegger to its challenge by Derrida and Foucault Though intended as a survey of this tradition throughout the twentieth century this study s focus is on the philosophical problems which gave it birth and even now continue to shape it The book reexamines Husserl as an early critic of epistemological naturalism whose grasp of the philosophical importance of the theory of meaning was largely ignored Heidegger s contrasting effort to revive ontology is examined in terms of his distinction between ontic and ontological questions In contrast with many earlier studies the author outlines confusions

engendered by the misappropriation of the distinct philosophical agendas of Husserl and Heidegger by such famous figures as Sartre and Merleau Ponty The book is also original in its emphasis on how social externalism in epistemology inspired by Karl Mannheim influenced this tradition's structuralist and Marxist phases The philosophical defenses of a theory of interpretation by Gadamer and Habermas are closely examined and assessed and the study concludes with a a probing yet balanced account of Foucault and Derrida as critics of philosophical autonomy The book concludes by reassessing this century long divide between the analytic and Continental traditions and its implication for the future of philosophy Provided by publisher **The Oxford Handbook of the Epistemology of Theology** William James Abraham, Frederick D.

Aquino, 2017 The Oxford Handbook of the Epistemology of Theology brings together leading scholars in the fields of theology and epistemology to examine and articulate what can be categorized as appropriate epistemic evaluation in theology Part one focuses on some of the epistemic concepts that have been traditionally employed in theology such as knowledge of God revelation and scripture reason and faith experience and tradition This section also considers concepts that have not received sufficient epistemological attention in theology such as saints authority ecclesial practices spiritual formation and discernment Part two concentrates on epistemic concepts that have received significant attention in contemporary epistemology and can be related to theology such as understanding wisdom testimony virtue evidence foundationalism realism antirealism skepticism and disagreement Part three offers examples from key figures in the Christian tradition and investigates the relevant epistemological issues and insights in these writers as well as recognizing the challenges of connecting insights from contemporary epistemology with the subject of theology proper namely God Part four centers on five emerging areas that warrant further epistemological consideration Liberation Theology Continental Philosophy modern Orthodox writers Feminism and Pentecostalism This authoritative collection explores how the various topics figures and emerging conversations can be reconceived and addressed in light of recent developments in epistemology Each chapter provides an analysis of the crucial moves positions and debates while also identifying relevant epistemic considerations This Handbook fulfills the need for the development of this new conversation that will take its natural place in the intersection of theology and epistemology It links the fields of theology and epistemology in robust meaningful and significant ways

Writing the Politics of Difference Hugh J. Silverman, 1991-06-04 This book addresses various phases of continental philosophy both in the context of its multiple traditions and in relation to the alternatives that mark the understanding of its present and future Divided into two parts the authors first focus on the diversity of traditions in continental philosophy in connection with the texts of Hegel Marx Kierkegaard Sartre and De Beauvoir Second they explore the reality of social political sexual and philosophical differences in connection with the writings of Merleau Ponty Arendt Habermas Heidegger Foucault Irigaray Kristeva Derrida and Vattimo They also stress the various theoretical foundations that manifest these differences Issues surrounding the role of philosophical systems language ethical choice relations with others the gendered

body socialization and the status of philosophy today constitute the fabric of this book The authors place these ideas in the context of current thought and current debates in continental philosophy and evaluate their significance for the future

The History of Continental Philosophy, 2010 *The Debate on Probable Opinions in the Scholastic Tradition* Rudolf Schuessler, 2019-03-25 In *The Debate on Probable Opinions in the Scholastic Tradition* Rudolf Schuessler portrays scholastic approaches to a qualified disagreement of opinions The book outlines how scholastic regulations concerning the use of opinions changed in the early modern era giving rise to an extensive debate on the moral and epistemological foundations of reasonable disagreements The debate was fueled by probabilism and anti probabilism in Catholic moral theology and thus also serves as a gateway to these doctrines All developments are outlined in historical context while special attention is paid to the evolution of scholastic notions of probability and their importance for the emergence of modern probability

Truth in Husserl, Heidegger, and the Frankfurt School Lambert Zuidervaart, 2017-06-09 An innovative ambitious tradition crossing study drawing on the work of Husserl Heidegger Horkheimer Adorno and Habermas to propose a new and transformative concept of truth The idea of truth is a guiding theme for German continental philosophers from Husserl through Habermas In this book Lambert Zuidervaart examines debates surrounding the idea of truth in twentieth century German continental philosophy He argues that the Heideggerian and critical theory traditions have much in common despite the miscommunication opposition and even outright hostility that have prevailed between them including significant roots in the phenomenology of Edmund Husserl Zuidervaart sees the tensions between Heideggerian thought and critical theory as potentially generative sources for a new approach to the idea of truth He argues further that the critical retrieval of insights from German continental philosophy can shed light on current debates in analytic truth theory Zuidervaart structures his account around three issues the distinction between propositional truth and truth that is more than propositional which he calls existential truth the relationship between propositional truth and the discursive justification of propositional truth claims framed in analytic philosophy by debates between epistemic and nonepistemic conceptions of truth and the relationship between propositional truth and the objectivity of knowledge often presented in analytic philosophy as a conflict between realists and antirealists over the relation between truth bearers and truth makers In an innovative and ambitious argument drawing on the work of Husserl Heidegger Horkheimer Adorno and Habermas Zuidervaart proposes a new and transformative conception of truth

Philosophy at the Limit David Wood, 2023-08-11 First published in 1990 *Philosophy at the Limit* was originally part of the *Problems of Modern European Thought* book series It pursues the theme of philosophy's confrontation with its own limits in modern philosophers from Hegel to Derrida including Nietzsche Wittgenstein Heidegger and Gadamer The author focuses on questions of philosophical style dialogue and indirect communication the structural closure of philosophical texts and performative strategy in philosophy The book is an accessible discussion of many of the complex issues that empower continental philosophy It will appeal to students of philosophy and contemporary thought

Schrift, 2010 **Marx and the Postmodernism Debates** Lorraine Landry, 2000-09-30 This book is a meticulous argument for the contemporary value of Marx's democratic theory as an interpretive key for the postmodernism debates Landry uses the works of Derrida Foucault and Lyotard to represent the poststructuralist camp and the writings of Habermas to represent the rationalist camp Viable social critique argues Landry mediates between pure social constructivist and pure realist metaphysics Postmodernism although critical of Marx aided the broader project of critical social theory particularly Marx's critique of social material contexts of oppression Indeed significant positive affiliations among Marx Habermas and the poststructuralists are found in their commitment to criticizing ideological aspects of bourgeois Enlightenment rationality and modernity Landry employs a fruitful tension strategy as seeking rapprochement among the modern and postmodern positions on hotly debated contemporary issues such as subjectivity criticism and the nature of reason Marxism continues to provide critical tools for articulating productive conflict within the postmodernism debates advancing of strategies of critique beyond identity politics toward a more self reflective ideological discussion of the multiple axes of power and oppression in political struggles over democracy In this unique study complex philosophical issues are described lucidly and their relevance for today is established compellingly

Contemporary Debates in Negative Theology and Philosophy Nahum Brown, J. Aaron Simmons, 2017-11-24 In this volume scholars draw deeply on negative theology in order to consider some of the oldest questions in the philosophy of religion that stand as persistent challenges to inquiry comprehension and expression The chapters engage different philosophical methodologies cross disciplinary boundaries and draw on varied cultural traditions in the effort to demonstrate that apophaticism can be a positive resource for contemporary philosophy of religion **Towards Speculative Realism: Essays** & Graham Harman, 2010-11-26 These writings chart Harman's rise from Chicago sportswriter to co founder of one of Europe's most promising philosophical movements Speculative Realism *The History of Continental Philosophy* Alan D.
