Zatsiorsky, William J. Kraemer, 2006 This edition examines fundamental concepts and principles practitioners need to understand in order to make decisions on what might be appropriate in the programme design for their athletes An integration of coaching theory and scientific underpinnings this book is useful for those interested in muscular strength **Debunking The Myth Of Human Made Climate Change** Michael J Cole, 2021-08-27 There has been a deliberate and orchestrated approach to promote the theory of human made climate change initiated largely by the IPCC which has created alarmist fears about climate and threats of global warming All such predictions have been wrong and exaggerated and have used manipulated data to do this These claims have become a dominant theme in world politics aided by the vast funding available for so called research but really for propaganda purposes The public has been misled by misinformation The real scientific data and facts however do not support the theory but disprove it and this book attempts to challenge the theory and explain the flaws in it The main claim of CO2 causing warming is not true there is no causal link Human produced CO2 is too small to have any effect anyway This book also tries to encourage an objective evaluation of the science and urges the media to make the real facts known and politicians to pull back from the unnecessary and damaging policies being implemented chasing a myth **Radical Critiques of the Law** Stephen M. Griffin, Robert C. L. Moffat, 1997 The past two decades have seen an outpouring of work in legal theory that is self consciously critical of aspects of American law and the institutions of the liberal state In this lively volume eminent scholars in philosophy law and political science respond to this recent scholarship by exploring what constitutes a radical critique of the law examining such theories as critical legal studies feminist theory and theories of difference and critical race theory The authors consider whether the critiques advanced in recent legal theory can truly be called radical and what form a radical critique of American law should

take Writing at the cutting edge of the critique of critical legal theory they offer insights first on critical legal scholarship then on feminist political and legal theory A third group of contributions questions the radicalness of these approaches in light of their failure to challenge fundamental aspects of liberalism while a final section focuses on current issues of legal reform through critical views on criminal punishment including observations on rape and hate speech Each major essay describes the underlying principles in the development of a radical legal theory and addresses unresolved questions relating to it while accompanying commentaries present conflicting views The resulting dialogue explores wide ranging issues like equity value relativism adversarial and empathic legal advocacy communitarianism and the social contract impartiality and contingency natural law and corrective justice A common thread for many of the articles is a focus on the social dimension of society and law which finds the individualism of prevailing liberal theories too limiting *Radical Critiques of the Law* is particularly unique in presenting critical and feminist approaches in one volume along with skeptical commentary about just how radical some critiques really are Proposing alternative critiques that embody considerably greater promise of being truly radical it offers provocative reading for both philosophers and legal scholars by showing that many claims to radicalism are highly problematic at best *I Call Bullshit* Jamie Frater, 2011-10-25 IS THAT SMART SOUNDING PERSON SPOUTING KNOWLEDGE OR ARE THEY FULL OF IT Do you want the real facts to counter and correct the steaming piles of myth and misinformation you hear all the time This fascinating collection tells exactly what you need to know so the next time you hear someone repeat one of these common falsehoods you ll be ready to call bullshit on Mary Magdalene was a prostitute Your heart stops when you sneeze Crime increases during a full moon A goldfish s memory lasts only a few seconds It was illegal to drink alcohol during Prohibition Chameleons change colour as camouflage Slaves built the pyramids in Egypt Decaf coffee has no caffeine Buddha was fat California. Supreme Court.
