Annie Besant

Decentralised G:

Decentralised Government in an Integrating World Dan Stegarescu, 2006-03-08 The book offers a comprehensive empirical analysis of the determinants of changes in the distribution of expenditure and revenue raising powers among fiscal tiers in OECD countries Using a new indicator of fiscal decentralisation which accounts for subnational decision making autonomy common decentralisation trends are investigated Then empirical evidence from panel analyses is provided for the role of costs preferences and institutions in explaining fiscal federal structures and for the impact of economic and political integration on the degree of government decentralisation particularly among EU countries Finally the historical experience of Germany is used to explore long term developments in the public sector Decentralisation in India Ganapathy Palanithurai, 2009 Decentralised Control Madan G. Singh, 1981 **Decentralization of government and forestry in Indonesia** Thung, P.H., 2019-06-03 The decentralization program that Indonesia embarked on in 1998 continues to unfold through manifold sometimes contradictory processes This working paper presents a concise and up to date overview of the aims dimensions and dynamics of decentralization Big Data Privacy and Security in Smart Cities Richard Jiang, Ahmed Bouridane, Chang-Tsun Li, Danny Crookes, Said Boussakta, Feng Hao, Eran A. Edirisinghe, 2022-09-08 This book highlights recent advances in smart cities technologies with a focus on new technologies such as biometrics blockchains data encryption data mining machine learning deep learning cloud security and mobile security During the past five years digital cities have been emerging as a technology reality that will come to dominate the usual life of people in either developed or developing countries Particularly with big data issues from smart cities privacy and security have been a widely concerned matter due to its relevance and sensitivity extensively present in cybersecurity healthcare medical service e commercial e governance mobile banking e finance digital twins and so on These new topics rises up with the era of smart cities and mostly associate with public sectors which are vital to the modern life of people This volume summarizes the recent advances in addressing the challenges on big data privacy and security in smart cities and points out the future research direction around this new challenging topic *A Quadratic Constraint Approach to Model Predictive Control of Interconnected Systems* Anthony Tri Tran C., Quang Ha, 2018-03-06 This book focuses on the stabilization and model predictive control of interconnected systems with mixed connection configurations It introduces the concept of dissipation based quadratic constraint for developing attractivity assurance methods for interconnected systems In order to develop these methods distributed and decentralized architectures are employed whereby the communication between subsystems is fully connected partially connected or completely disconnected Given that the control inputs are entirely or partially decoupled between subsystems and no additional constraints are imposed on the interactive variables beyond the coupling constraint itself the proposed approaches can be used with various types of systems and applications Further the book describes how the effects of coupling delays and data losses in device networks are resolved From a practical perspective the innovations presented

are of benefit in applications in a broad range of fields including the process and manufacturing industries networked robotics and network centric systems such as chemical process systems power systems telecommunication networks transportation networks and no less importantly supply chain automation

Cameroon: The Stakes and Challenges of Governance and Development Nsoh Fonchingong, Bobuin Gemandze, 2009-08-15 This book deals with the important subject of governance and development Even more significantly the book has the merits of critically evaluating the concept of good governance in an African context identifying the internal factors that impinge on good governance and development and proposing solutions It provides empirical evidence on the extent to which inappropriate governing strategies are the main internal obstacle to development in Cameroon The authors discuss factors contributing to precarious and problematic governance from multidisciplinary perspectives and demonstrate the extent to which such inadequacies impede positive social change To promote effective development the authors argue for the implementation of a good governance strategy that comprises inter alia adopting appropriate development strategies decentralizing administration to make for popular participation and ensure accountability taking the necessary steps to fight corruption and ensuring the enforcement of property and cultural rights

Decentralised Governance and Planning Abdul Aziz, 2002 This book is a comparative study of decentralisation processes in the three southern states viz Andhra Pradesh Karnataka and Tamil Nadu The book attempts at understanding the nature of Panchayati Raj system in these states The case study method has been employed to analyse the experiment of decentralisation A useful book for planners policymakers and researchers of Indian politics

Municipal Wastewater Management in Developing Countries Zaini Ujang, Mogens Henze, 2006-04-30 Municipal Wastewater Management in Developing Countries discusses various approaches to municipal wastewater management in order to protect both public health and the environment with the major focus being on waterborne diseases Developing countries can be divided into two main categories i e countries in transition with higher growth rates where industrialisation and urbanisation are taking place rapidly and countries with slower growth rates It is important therefore that approaches should be tailor made and site specific In general the major trends of water pollution control have significantly contributed to the development of conventional sanitation approaches in terms of legal and financial frameworks as well as technological enhancement Despite advances in the science engineering and legal frameworks 95 per cent of the wastewater in the world is released into the

environment without treatment Only five per cent of global wastewater is properly treated using the standard sanitation facilities mainly in developed countries As a result the majority of the world's population is still exposed to waterborne diseases and the quality of water resources has been rapidly degraded particularly in poor developing countries The challenge now is to provide the world's population especially the poor with adequate water and sanitation facilities Despite billions of dollars of investment spent every year billions of poor people are still suffering and dying because of poor sanitation At the beginning of this century about 1.1 billion people lived without access to clean water compared to about the same number in 1990 2.4 billion without appropriate sanitation compared to 2.3 billion in 1990 and four billion without sound wastewater disposal The future scenario that water resources will be further depleted by a growing world population will be coupled with environmental degradation due to poor pollution control particularly in most of the developing countries In order to address the issue of water and wastewater management in developing countries it is necessary to take into consideration the segments of the society itself particularly the types of housing areas The segments will indicate the level of socio-economic mentality and knowledge which is important for any planned changes in their life style and social engineering It is also important to segregate the funding framework of any proposed projects High income urban communities for instance are generally willing to pay for sewerage services and higher water supply tariffs therefore a designated system can be accordingly provided Over the past 10 years serious criticism has been given to the conventional sanitation approach consequently many definitions concepts and characteristics have been proposed on sustainable sanitation Sustainable sanitation is a relevant concept in order to achieve the Millennium Development Goals by 2015 of providing water supply and adequate sanitation for developing countries Sustainable sanitation is flexible in approach any community poor or rich urban or rural water rich or water poor country and requires lower investment costs compared to conventional sanitation approaches It is also important to note that the framework of sustainable sanitation is much easier to adopt in developing countries where water supply and sanitation infrastructures are still in the developing stages In some developing countries no public facilities are available therefore it is an ideal condition to start a new infrastructure with a new framework This comprehensive reference prepared by leading international authorities will provide an invaluable reference for all those concerned with the management of sanitation services in developing countries worldwide **Decentralised Energy,**
