**Decentralization: Achieving Reform** Mario D. Fantini, Marilyn Gittell, 1973      Steps to Local Government Reform

Allyn O. Lockner, 2013-03-29 Does the performance of your local government leave something to be desired Maybe you're not satisfied with the services your government provides or maybe the cost for these services is far too much If so take heart you can do something about it Steps to Local Government Reform is your step by step guide to undertaking reform on the local level Public manager Allyn O Lockner combines years of experience in the public sector to show how you as a resident or an elected local official can work with others to successfully implement change within your community Lockner explains how to make numerous choices regarding the preparation for and the study planning marketing approval implementation and evaluation of reforms He also shows you how to share these reform results with others Using various criteria comparisons practices analyses and other studies aimed at local government performance Lockner delves into the sometimes tricky world of enacting reform He reveals how local government works and provides a map for maneuvering around bureaucratic roadblocks In addition he includes a comprehensive bibliography for research an appendix of terms commonly used in the reform process and guides to creating reform models that are likely to work With this compendium you can help resolve vital issues improve your community and live a better life      **The State of State Reforms in Latin America** Eduardo

Lora, 2006-10-23 Latin America suffered a profound state crisis in the 1980s which prompted not only the wave of macroeconomic and deregulation reforms known as the Washington Consensus but also a wide variety of institutional or second generation reforms The State of State Reform in Latin America reviews and assesses the outcomes of these less studied institutional reforms This book examines four major areas of institutional reform a political institutions and the state organization b fiscal institutions such as budget tax and decentralization institutions c public institutions in charge of sectoral economic policies financial industrial and infrastructure and d social sector institutions pensions social protection and education In each of these areas the authors summarize the reform objectives describe and measure their scope assess the main outcomes and identify the obstacles for implementation especially those of an institutional nature      **1974 Annual**

**Supplement** Joan Schmitz Bergholt, 2013-12-21      **Resources in Education**, 1974-07      *Decentralization in Education*

Donald R. Winkler, 1989      *Controlling Public Education* Kathryn A. McDermott, 1999 Most Americans believe that local school districts are the only means by which citizens may exercise control over public education Kathryn McDermott argues to the contrary that existing local institutions are no longer sufficient for achieving either equity or democratic governance Not only is local control inequitable it also fails to live up to its reputation for guaranteeing public participation and citizen influence Drawing upon democratic theory and the results of field research in New Haven Connecticut and three suburbs McDermott contends that our educational system can be made more democratic by centralizing control over funding while

decentralizing most authority over schools to the level of schools themselves while enacting public school choice controlled for racial balance To many people in Connecticut and elsewhere the tension between equal opportunity for all students and local control of public education seems impossible to resolve In 1996 the Connecticut Supreme Court ruled in *Sheff v O'Neill* that local control produces unconstitutional segregation of public schools Nearly all of the state's 169 towns operate their own public schools and like the towns they serve the schools are generally homogeneous with respect to race and socioeconomic class In the *Sheff* ruling the court declared that making school districts coterminous with town lines is the single most important factor contributing to the present concentration of racial and ethnic minorities in the Hartford public school system At the same time the court also acknowledged that the town based school system presently furthers the legitimate nonracial interests of permitting considerable local control and accountability in educational matters In Connecticut and elsewhere it has often seemed necessary to choose between local control and equity in public education and local control has almost always won McDermott argues that rather than seeing local control and equity as conflicting goals policymakers should regard them as equally important components of democracy in public education In her view a truly democratic system of education should both encourage citizen participation in school governance and contribute to the formation and maintenance of a social order in which equality of opportunity prevails over hierarchies of privilege Centralizing distribution of resources and using controlled choice to end racial isolation would provide greater equality of opportunity while decentralizing management of schools would expand citizen participation McDermott's conclusions break new ground in our understanding of local school governance itself and call into question the conventional wisdom about local participation These findings should interest those who study school governance and reform especially in an urban setting as well as policy makers administrators teachers students and citizens eager to improve their schools

**Research in Education**, 1974      **Urban Management** Bernard H. Ross, 1979      *A Study to Examine Differences in the Autonomy of School Sites as Reported by Principals from a National Sample of School Districts* John Malcolm Graves, 1979      **The Sociology of Education** Ann Parker Parelius, Robert James Parelius, 1978      **Policy Analysis and Management** Robert Goehlert, Fenton S. Martin, 1985      *Building Civic Capacity*, 2001 The authors of this volume argue that urban education is in urgent need of reform and that although there have been plenty of innovative and even promising attempts to improve conditions most have been doomed The reason for this they agree lies in the failure of our major cities to develop their civic capacity The ability to build and maintain a broad social and political coalition across all sectors of the urban community in pursuit of a common goal      *Education and Society*, 2003      **Public Finance and Economic Growth in Developing Countries** Stephen Peterson, 2015-04-24 Public finance is crucial to a country's economic growth yet successful reform of public finances has been rare Ethiopia is an example of a country that undertook comprehensive reform of its core financial systems independent of the IMF and the World Bank and successfully transformed itself into one of the fastest growing

economies in Africa With Ethiopia s twelve year reform as its guiding case study this book presents new analytical frameworks to help governments develop better financial reforms It shows in detail how four core financial systems budgeting accounting planning and financial information systems can be reformed One of the principal findings presented is that governments must establish basic public financial administration before moving to more sophisticated public financial management Other key findings include the identification of four strategies of reform recognize improve change and sustain the centrality of ongoing learning to the process of reform and the importance of government ownership of reform This book will be of interest to researchers and policymakers concerned with public finance developmental economics and African studies
