Transforming Strategic Decision-making through Finance Business Partnering Jimoh K. Ololade, Xihui Haviour Chen, Victor Chang, 2024-09-09 This book addresses a significant research gap by delving into the Finance Business Partnering FBP model within the not for profit sector of the Gulf countries with a specific emphasis on Qatar Foundation While an extensive body of literature explores the FBP model in developed nations there exists a notable dearth of research in the Middle East and third world countries The book aims to rectify this imbalance by offering practical insights derived from Qatar Foundation showcasing the advantages of adopting the FBP model It goes beyond theoretical frameworks presenting in depth data analysis that substantiates the pivotal role of FBPs in supporting effective decision making processes By delving into essential concepts such as change management contingency theory and organizational culture the book provides a comprehensive understanding of the factors influencing the successful adoption and implementation of the FBP model Notably it introduces practical examples and real world applications to underscore the model s efficacy making it a valuable resource for both scholars and practitioners in the fields of management and financial accounting

Decision-Aiding Software and Legal Decision-Making Stuart S. Nagel, 1989-09-26 The use of microcomputers as decision aids in law

practice is increasing rapidly Nagel here shows how developments in software over the last few years are making microcomputers practically indispensable to lawyers as decision aids This is in contrast to his earlier book on Microcomputers as Decision Aids in Law Practice It dealt speculatively with ways in which decision aiding software could be used by lawyers for judicial prediction litigation strategy allocating scarce resources and negotiation mediation The book is divided into three parts covering general developments specific lawyer skills and application to all fields of law The first part previews various uses of decision aiding software by practicing lawyers including a general discussion of the potential and actual benefits of such software How decision aiding software enhances specific lawyer skills comprises the second and largest part of the work Among the topics discussed are computer aided counseling computer aided mediation legal policy evaluation and computer aided advocacy law prediction and legal administration In the third part Nagel assesses applications of decision aiding software to all fields of law with an emphasis on contracts property torts family law criminal law constitutional law economic regulation international law civil procedure and criminal procedure In a provocative concluding chapter he deals with the thorny issues of individual ethics and professional responsibility in the context of microcomputers Because decision aiding software encourages decision makers to be much more explicit about their goals than they otherwise would be its use raises questions as to whose goals should be pursued and to what degree This is a nuts and bolts guidebook that will be a valuable tool for practicing attorneys with some knowledge of microcomputers and is recommended reading for legal scholars and law students
