Decision Making Under Uncertainty Models And Choices:

Decision Making Under Uncertainty Charles A. Holloway, 1979 Decision Making under Uncertainty Kerstin Preuschoff, Peter N. C. Mohr, Ming Hsu, 2015-06-16 Most decisions in life are based on incomplete information and have uncertain consequences To successfully cope with real life situations the nervous system has to estimate represent and eventually resolve uncertainty at various levels A common tradeoff in such decisions involves those between the magnitude of the expected rewards and the uncertainty of obtaining the rewards For instance a decision maker may choose to forgo the high expected rewards of investing in the stock market and settle instead for the lower expected reward and much less uncertainty of a savings account Little is known about how different forms of uncertainty such as risk or ambiguity are processed and learned about and how they are integrated with expected rewards and individual preferences throughout the decision making process With this Research Topic we aim to provide a deeper and more detailed understanding of the processes behind decision making under uncertainty Decision Making und uncertainty: Models and choices , 1979

Decision Making Under Uncertainty Charles A. Holloway, 1979 Introduction and basic concepts Models and probability Choices and preferences Preference assessment procedures Behavioral assumptions and limitations of decision analysis Risk sharing and incentives Choices with multiple attributes Decision-Making Experiments under a Philosophical Analysis: Human Choice as a Challenge for Neuroscience Gabriel José Corrêa Mograbi, Carlos Eduardo Batista de Sousa, 2015-10-15 This introduction just aims to be a fast foreword to the special topic now turned into an e book The Editorial Decision Making Experiments under a Philosophical Analysis Human Choice as a Challenge for Neuroscience alongside with my opinion article Neurophilosophical considerations on decision making Pushing up the frontiers without disregarding their foundations play the real role of considering in more details the articles and the whole purpose of this e book What I must highlight in this foreword is that our intention with such a project was to deepen into the very foundations of our current paradigms in decision neuroscience and to philosophically moot its foundations and repercussions Normal Science a term coined by Philosopher Thomas Kuhn works under a research consensus among a scientific community A shared paradigm consolidated methods widespread convictions Pragmatically winning formulas must be kept although not at any cost What differentiates a gifted and revolutionary scientist from a more bureaucratic colleague is the capacity and willingness of constantly reevaluating depurating and refining his her own paradigm That is best strategy to avoid that a paradigm itself would gradually come under challenge In my view some achievements in this sense were brought about in our project The e book will be inspiring and informative for both neuroscientists that are concerned with the very foundations of their works and for philosophers that are not blind to empirical evidence Kant once said Thoughts without content are empty intuitions without concepts are blind Paraphrasing Kant we could say Philosophy without science is empty science without philosophy is blind

Experiments on Decisions under Risk: The Expected Utility Hypothesis P.J.H. Schoemaker, 2013-11-11 In this

valuable book Paul Schoemaker summarizes recent experimental and field research that he and others have undertaken regarding the descriptive validity of expected utility theory as a model of choice under uncertainty His principal message is that this paradigm is too narrow in its conception and misses some of the important elements of a descriptive model of individual choice In particular Schoemaker calls attention to the importance of individual differences task effects and context effects as they influence behavior The expected utility hypothesis has come under scrutiny in recent years from a number of different quarters This book brings together these many studies and relates them to the large body of literature on individual decision making under risk Although this paradigm may be appropriate for describing behavior under many conditions of uncertainty Schoemaker presents convincing evidence that it does not do well with respect to protection against low probability events For example he shows that the insurance purchase decision is influenced by the way information is presented to the client as well as by the statistical knowledge of the respondents

The Cognitive Basis for Decision Making Under Risk and Uncertainty: Research Programs & Controversies Samuel Shye, Riccardo Viale, Shabnam Mousavi, 2025-03-13 This issue aims to portray justify advance contrast and illustrate research programs in the domain of cognitive decision making under risk and uncertainty where such research programs are intended to promote theories models or conceptual frameworks for Prediction of empirical observations Descriptions of empirical results likely or rationalized to lead to predictions e.g. models with free parameters whose values are part of a hypothesis to be tested or cross validation of descriptive model results Generalizations of many specific empirical results Normative models alternative to Expected Utility Theory EUT Replications of published results concerning any of the above Any of the above may concern any aspect statistic of empirical data including Individual or group behavior itself e.g. prediction of people's actual choices differences or difference in rankings of Individual or group behavior distribution of responses for the general purpose of promoting scientific understanding of individual or collective human behavior in the domain of decision making under risk or uncertainty In particular this issue may shed light on the controversy between Behavioral Economics and Cognitive Economics The first relates to Kahneman and Tversky's program of Heuristics and Biases and the normative model of formal rationality whereas the second is connected to Simon Gigerenzer and Viale's program of simple adaptive heuristics and the normative model of ecological bounded rationality Both of which aim to improve economics on a cognitive basis

Decision Making Under Uncertainty David E. Bell, Arthur Schleifer, 1995 These authors draw on nearly 50 years of combined teaching and consulting experience to give readers a straightforward yet systematic approach for making estimates about the likelihood and consequences of future events and then using those assessments to arrive at sound decisions The book's real world cases supplemented with expository text and spreadsheets help readers master such techniques as decision trees and simulation such concepts as probability the value of information and strategic gaming and such applications as inventory stocking problems bidding situations and negotiating
