Staub,1966 Decision-Aiding Software and Legal Decision-Making Stuart S. Nagel,1989-09-26 The use of microcomputers as decision aids in law practice is increasing rapidly Nagel here shows how developments in software over the last few years are making microcomputers practically indispensable to lawyers as decision aids This is in contrast to his earlier book on Microcomputers as Decision Aids in Law Practice It dealt speculatively with ways in which decision aiding software could be used by lawyers for judicial prediction litigation strategy allocating scarce resources and negotiation mediation The book is divided into three parts covering general developments specific lawyer skills and application to all fields of law The first part previews various uses of decision aiding software by practicing lawyers including a general discussion of the potential and actual benefits of such software How decision aiding software enhances specific lawyer skills comprises the second and largest part of the work Among the topics discussed are computer aided counseling computer aided mediation legal policy evaluation and computer aided advocacy law prediction and legal administration In the third part Nagel assesses applications of decision aiding software to all fields of law with an emphasis on contracts property torts family law criminal law constitutional law economic regulation international law civil procedure and criminal procedure In a provocative concluding chapter he deals with the thorny issues of individual ethics and professional responsibility in the context of microcomputers Because decision aiding software encourages decision makers to be much more explicit about their goals than they otherwise would be its use raises questions as to whose goals should be pursued and to what degree This is a nuts and bolts guidebook that will be a valuable tool for practicing attorneys with some knowledge of microcomputers and is recommended reading for legal scholars and law students *A Framework for the Analysis and Improvement of Evaluation Systems in the Consultative Group for International Agriculture Research(CGIAR)* Mary Ellen Mulholland,1993 New Directions for Program Evaluation ,1989 Toxicological Risk Assessment: General criteria and case studies ,1985 **Handbook of Research Design and Social Measurement** Delbert C. **Qualitative Approaches to Evaluation in Education** David Fetterman, 1988-09-07 Critics of qualitative educational evaluation frequently assume this approach is a monolithic entity rather than a multitude of varied approaches This collection dispels this myth by comparing contrasting and clarifying various qualitative approaches It represents a wealth of practical alternatives designed to add to the evaluator's arsenal The editor has combined classic papers with newer writings to present a comprehensive coverage of varied approaches in the field including ethnography naturalistic inquiry generic pragmatic sociological qualitative inquiry connoisseurship and criticism and a few completely new qualitative approaches which are presented in this work by their founders or major proponents

**Proceedings of the Fourteenth Hawaii International Conference on System Sciences**, 1981

**Judging Plans and Projects** James Parkin, 1993 This study develops an approach to the evaluation of plan and project alternatives The difficult trade offs between technical or social goals and the inevitable environmental impacts are discussed in socio-political terms and a case is put for the early mobilization of citizen groups in the process of assessment Current evaluation methods tend to be either threateningly mathematical or largely intuitive and often ignore the essentially political nature of public choice The methodology developed in this book enables a final decision to be made based on the use of rational judgement aids placed alongside formally structured public interest arguments representing the different social policies of the interested groups This new method informs decision makers by bringing together the strengths of analysis and richness of human values Particular attention is paid to the wide range of judgement aids available to the planning professional and examples of their use are presented in appendices
