Decision Making Chicago Style Hb:

Decision Making: Social and Creative Dimensions C.M. Allwood, M. Selart, 2013-04-17 Decision making is a complex phenomenon which normally is deeply integrated into social life. At the same time the decision making process often gives the decision maker an opportunity for conscious planning and for taking a reflective stance with respect to the action considered. This suggests that decision making allows creative solutions with a potential to change the course of events both on an individual and a collective level. Given these considerations we argue that in order to more fully understand decision making the perspectives of different disciplines are needed. In this volume we have attempted to draw together contributions that would provide a broad view of decision making. Much work has been carried out in the writing and editing of this volume. First of all we would like to thank the contributors for their efforts in producing interesting and important texts and for their patience in the editorial process. Each chapter was edited by two or three reviewers. These reviewers are listed on a separate page in this book. Our heartfelt thanks go to them for their time and for their incisive and constructive reviews. We are also grateful to the publishing editors at Kluwer Academic Publishers, Christiane Roll and Dorien Francissen who have been generous with their encouragement and patience throughout the editorial process. Aviation Social Science: Research Methods in Practice Mark W. Wiggins, Catherine Stevens, 2016-12-05 This book is a guide that addresses social science research issues within the aviation industry. Studies involving human factors, personality, training, systems evaluation, decision making, crew resource management, and situation awareness are used to illustrate not only the process but also the outcomes that can emerge from social science research. The book describes the principles involved in conceptualising a research problem, obtaining management support, developing an appropriate timeframe, obtaining ethics approval, and collecting and managing data. It also provides useful guidelines concerning the publication of research in magazines, academic journals, and conference presentations. The topics are illustrated with aviation examples, and the principles are deliberately broad. This book will be a useful guide for both novice and experienced researchers, especially pilots, air traffic controllers, maintenance personnel, aviation management, aviation researchers, safety personnel, and undergraduate and postgraduate university students.
