Abstract. Collaborative consultation-making is a group decision-making process to reduce group members' diverging and agree on a decision. This brief note describes a working group on common goal. Collaborative may be defined professionally as an intersubjective consultation. It is about not diverging but the consensus and the process of reaching a consensus. Collaborative consultation-making is then concerned with the process of collaborating and reaching a decision, and the social, economic, legal, environmental and political effects of reaching that decision.

- Quantitative research is based on the objective measures it puts in place. It attempts to generate evidence that measures as group members vary. This method is best used to understand and measuring individual members within primary relationships for research and development.

Seeley,2010-09-20 How honeybees make collective decisions and what we can learn from this amazing democratic process Honeybees make decisions collectively and democratically Every year faced with the life or death problem of choosing and traveling to a new home honeybees stake everything on a process that includes collective fact finding vigorous debate and consensus building In fact as world renowned animal behaviorist Thomas Seeley reveals these incredible insects have much to teach us when it comes to collective wisdom and effective decision making A remarkable and richly illustrated account of scientific discovery *Honeybee Democracy* brings together for the first time decades of Seeley s pioneering research to tell the amazing story of house hunting and democratic debate among the honeybees In the late spring and early summer as a bee colony becomes overcrowded a third of the hive stays behind and rears a new queen while a swarm of thousands departs

with the old queen to produce a daughter colony Seeley describes how these bees evaluate potential nest sites advertise their discoveries to one another engage in open deliberation choose a final site and navigate together as a swirling cloud of bees to their new home Seeley investigates how evolution has honed the decision making methods of honeybees over millions of years and he considers similarities between the ways that bee swarms and primate brains process information He concludes that what works well for bees can also work well for people any decision making group should consist of individuals with shared interests and mutual respect a leader's influence should be minimized debate should be relied upon diverse solutions should be sought and the majority should be counted on for a dependable resolution An impressive exploration of animal behavior Honeybee Democracy shows that decision making groups whether honeybee or human can be smarter than even the smartest individuals in them

In Pursuit of Creative Conflict Management: an Overview Winston A. Richards D.Min., 2019-07-17 The transition from classroom lectures and practice preaching into the real world of ministry is not always smooth The anticipation of putting into practice the ideas arising from one's education is dampened by the emergence of opposition Experience leads the youthful pastor to recognize the need to balance zeal knowledge and enthusiasm with improved interpersonal skills

Living in Utopia Lucy Sargisson, Lyman Tower Sargent, 2017-03-02 Utopia is literally the good place that is no place Utopias reveal people's dreams and desires and they may gesture towards different and better ways of being But they are rarely considered as physical observable phenomena In this book Sargisson and Sargent both established writers on utopian theory turn their attention to real life utopian communities The book is based on their fieldwork and extensive archival research in New Zealand a country with a special place in the history of utopianism A land of opportunity for settlers with dreams of a better life New Zealand has per capita more intentional communities groups of people who have chosen to live and sometimes work together for a common purpose than any country in the world Sargisson and Sargent draw on the experiences of more than fifty such communities to offer the first academic survey of this form of living utopian experiment In telling the story of the New Zealand experience Living in Utopia provides both transferable lessons in community cooperation and social change and a unique insight into the utopianism at the heart of politics society and everyday life

Emergent Issues in Human Decision Making Gerald M. Phillips, Julia T. Wood, 1984 A critical examination of the concept of decision making or consensus that has held sway in thinking about groups since its introduction in the 1930s As a part of the group dynamics movement the concept of consensus was accepted perhaps without adequate reflection regarding its nature and utility as a way of thinking about and teaching about group process The authors carefully define the concept trace it historically and critically evaluate its merit to create an understanding of what happens when groups of people come together to work things out The contributors are William K Rawlins Randy Y Hirokawa Nancy Wyatt Lynne Kelly

Cynthia F Begnal Christopher Waagen Susan L Kline Janet M Ceropski and Paul G Friedman The result of their studies is the recognition that consensus is a concept not an entity or a state of being While an important concept that is useful as a critical tool it must be treated as a concept an abstraction created and used by those who wish to study how people reach collective agreements The KRC Handbook of Fund Raising Strategy and Tactics Joseph A.
