**Ireland and the British Empire** Kevin Kenny, 2004-05-27 Modern Irish history was determined by the rise expansion and decline of the British Empire British imperial history from the age of Atlantic expansion to the age of decolonization was moulded in part by Irish experience But the nature of Ireland s position in the Empire has always been a matter of contentious dispute Was Ireland a sister kingdom and equal partner in a larger British state Or was it because of its proximity and strategic importance the Empire s most subjugated colony Contemporaries disagreed strongly on these

questions and historians continue to do so Questions of this sort can only be answered historically Ireland's relationship with Britain and the Empire developed and changed over time as did the Empire itself This book offers the first comprehensive history of the subject from the early modern era through to the contemporary period The contributors seek to specify the nature of Ireland's entanglement with empire over time from the conquest and colonization of the sixteenth and seventeenth centuries through the consolidation of Ascendancy rule in the eighteenth the Act of Union in the period 1801-1921 the emergence of an Irish Free State and Republic and eventual withdrawal from the British Commonwealth in 1948 They also consider the participation of Irish people in the Empire overseas as soldiers administrators merchants migrants and missionaries the influence of Irish social administrative and constitutional precedents in other colonies and the impact of Irish nationalism and independence on the Empire at large The result is a new interpretation of Irish history in its wider imperial context which is also filled with insights on the origins expansion and decline of the British Empire *Postcolonial Theory*, 1999 **W.B. **Journal of Cultural Studies**, 2001 **Enlarging the Democratic Possible** Alexander Keller Hirsch, 2011 *Annual Report on English and American Studies*, 2002 **ALA Bulletin**, 2003 **The University** Paul A. Bové, 2000 The essays collected in this issue of *boundary 2* were written in response to a call for papers that would treat the contemporary university in various regions and stages of formation around the world in light of the interaction between local and global realities Underlying this project is the assumption that profound changes in economy and world organization transform the function and value of universities in tension not only with the regional histories and forces in which particular universities function but also with what used to be called the idea of the university The authors of these essays approach this topic in two ways some present the history and current situation of the university in a given place and politics and some write of the new university's political economy as the state withdraws support for higher education and hands the institutions over to entrepreneurial and transnational corporate culture None of these essays defends the idea that the university pursues knowledge for its own sake Yet there is a tinge of nostalgia for this idea or at least for the idea that the university's task is to educate to destroy bias to cultivate Of course such an idea remains the public justification for the existence of the university especially in the advanced capitalist societies whose higher classes benefit the most from the globalization of economic production **Look Away!** Jon Smith, Deborah Cohn, 2004-07-21 Examines what happens to our paradigms of the American south if we understand the south hemispherically to include Latin America and the Caribbean *Diaspora*, 2003
