for proving the then controversial theory of continental drift Marie's scientific knowledge her eye for detail and her skill as an artist revealed not a vast empty plane but an entire world of mountains and volcanoes ridges and rifts and a gateway to the past that allowed scientists the means to imagine how the continents and the oceans had been created over time Hali Felt brings to vivid life the story of the pioneering scientist whose work became the basis for the work of others scientists for generations to come Felt's enthusiasm for Tharp reaches the page revealing Tharp who died in 2006 to be a strong-willed woman living according to her own rules *The Washington Post* *Shadows of Existence* Matthew A.
