AI IN EDUCATION: EMPOWERING LEARNING AND TEACHING Prof. Sanjay Agal, 2023-08-21 With the assistance of artificial intelligence which has the ability to radically revolutionize the educational system the processes of teaching and learning may be made more successful This may be the case for both teaching and learning The ever expanding capabilities of AI make it feasible for it to develop personalised learning experiences to streamline administrative operations to improve student assessment and to give teachers with crucial insights In the field of education the following is a list of significant areas in which artificial intelligence is making learning and teaching more possible

Individualized Instruction The ability of artificial intelligence to analyze vast amounts of student data such as performance preferences and learning styles enables it to give students with the opportunity to participate in individualized learning The material covered in a class as well as its pace and level of difficulty may be adjusted by intelligent tutoring systems to meet the needs of each specific learner This leads to improved levels of involvement and understanding on the part of the students

Platforms for Adaptive Learning AI powered adaptive learning platforms utilize algorithms that continually assess a student's progress and adjust the learning material accordingly The name given to these kinds of systems is adaptive learning platforms These platforms either identify the specific areas in which students need further practice or present them with additional resources to assist them with their study Because it caters to the specific requirements of each individual student adaptive learning is able to maximize the educational advantages that it offers to their fullest potential

Intelligent Virtual Assistants Chatbots and other types of virtual assistants that are driven by artificial intelligence AI are available to provide students with rapid help They are able to provide students with answers explanations and support as well as send them in the direction of resources that are relevant to the situation Intelligent virtual assistants make it easier to obtain more information and also promote individual study

1 Page Automated marking and commenting systems Artificial intelligence has the ability to automate the grading process for objective tests such as multiple choice questions This would free up the time of educators so that they could focus on more involved tasks

Techniques such as Natural Language Processing NLP make it feasible for artificial intelligence to evaluate subjective forms of assessment such as essays and provide students detailed feedback The

employment of artificial intelligence AI technology which may assist educators in producing content of a higher level may be of assistance in the production of intelligent content They are able to generate interactive materials develop tests and pick resources in a manner that is congruent with certain educational objectives Tools for producing content that are powered by artificial intelligence boost efficiency and help teachers generate interesting instructional materials Analytics Predictive Artificial intelligence is able to spot patterns and produce forecasts by analyzing huge volumes of data which allows it to generate predictions about the performance of pupils as well as their behavior and the repercussions of their activities Educators have the ability to make use of these insights in order to intervene early and provide timely assistance to students who are having difficulty so improving both retention rates and academic attainment The terms Virtual Reality VR and Augmented Reality AR refer to the following Virtual reality VR and augmented reality AR may deliver learning experiences that are both immersive and engaging if they are combined with AI technology Students have the chance to expand both their theoretical understanding and their ability to put that understanding into practice in a range of domains by exploring virtual environments carrying out experiments and taking part in simulations Making decisions based on the data provided Artificial intelligence assists many stakeholders in the education system in making decisions based on data The analytics made available by AI could be of use to administrators at educational institutions in recognizing trends enhancing resource allocation and improving operational efficiency Dashboards that are powered by AI provide real time information on the progress that students are making allowing instructors to adjust their instructional strategies in accordance with the needs of their pupils

Artificial Intelligence in Pathogenic Microorganism

Research Chen Li,Yu-Dong Yao,Marcin Grzegorzec,2025-05-26 Infections caused by pathogenic microorganisms including bacteria viruses fungi and other eukaryotic microbes seriously threaten human health Traditional research methods and laboratory techniques have many limitations and focus more on the identification and classification of pathogenic microorganisms In recent years technologies such as whole genome sequencing and advanced bioinformatics analysis have promoted the research of pathogenic microorganisms However with the interplay of multiple factors like global climate change ecological and environmental changes urbanization social behavior and lifestyle changes pathogenic microorganisms transmission patterns and impact scope are gradually changing There is an urgent need for multidimensional technological approaches to achieve epidemiological monitoring and evolutionary direction prediction of pathogenic microorganisms Additionally more robust data processing and analysis capabilities are required for rapid identification and diagnosis monitoring of drug resistance development of antimicrobial drugs and vaccines and optimization of treatment plans Therefore Artificial Intelligence AI has entered our field of vision In the field of pathogenic microorganisms AI has shown tremendous potential In epidemiological research AI technology can quickly and automatically collect integrate and analyze the epidemic data of infectious diseases from different regions so as to predict the trend and scope of disease transmission and track the source of infection In the process of diagnosis and treatment of infectious diseases machine learning can not only analyze the microscopic images of pathogens but also analyze the genome sequences of multiple pathogens in a short time and predict their sensitivity or resistance to specific antibiotics greatly improving the efficiency and accuracy of diagnosis and treatment of infectious diseases In drug or vaccine development researchers can use AI models to predict efficient antigens for diseases such as HIV and influenza and thus design more effective vaccine candidates AI models can also analyze the interactions between drugs pathogens and patients in order to design the optimal dosing regimen for each patient In a word AI can help human beings better deal with infectious diseases We welcome original reviews articles and other contributions in related fields which mainly include the following aspects 1 The application of AI in the differential diagnosis of pathogenic microorganisms 2 The application of AI in the formulation of anti infection treatment plans 3 The application of AI in monitoring and predicting the prevalence of pathogenic microorganisms 4 Application of AI in the prediction and prevention of infectious diseases caused by pathogenic microorganisms 5 The application of AI in the research
