Dixon,Dana Mastro,2024-06-21 This volume fully illuminates the role of diversity in media representation dissemination and effects across various platforms including social media Against a backdrop of shifting demographics and increasing diversity the book highlights the implications for media consumption patterns and explores the simultaneous rise in online hate Organized into three thematic sections the book first centers people of color in the discussion of media stereotypes and identity considering the impact of technology on such identities This volume then moves to analyze the news media and how stereotypes are presented and perpetuated before focusing on paradigm shifts brought on by critical media effects and counter stereotyping research The empirical studies and theoretical analyses push readers to imagine better how Communication scholars can advance this essential work at a precarious time in history Budding and senior scholars interested in understanding stereotypical media representations and effects will gain insights from this critical and timely book and it will interest those working in the areas of media and communication media representation social justice diversity and inclusion media sociology social media and journalism **Collaboration for Sustainability and Innovation: A Role For Sustainability Driven by the Global South?** Diego A. Vazquez-Brust,Joseph Sarkis,James J. Cordeiro,2013-11-20 A number of arguments are made by an international group of authors in this though provoking book about an understudied and socially important context A future in which financial wealth transfers across the North South divide from richer to poorer countries is far from sufficient for the

relief of poverty and the pursuit of sustainability Caution must be taken when growth is achieved through the liquidation of the natural wealth of poorer nations in order to maintain a global economic status quo Neither poverty reduction nor sustainability will ultimately be achieved The financial collapse and social upheaval that might result will make the most recent economic downturn look trivial by comparison What is more urgently needed instead as argued in this book is collaboration for sustainability and innovation in the global South especially building on models originally developed in the South that are transferable to the North In pursuit of a sustainable and more equitable future the book examines such topics as Cross Border Innovation in South North Fair Trade Supply Chains Potential Pollution Prevention Programs in Bangladesh Digital Literacy and Social Inclusion in the South through Collective Storytelling and Eco innovation at the Bottom of the Pyramid Many of these stories and have not been told and need greater visibility The book contributes in a meaningful way to the discussion of how innovation and sustainability science can benefit both sides in South North innovation collaborations It provides useful introduction to the topics as well as valuable critiques and best practices This back and forth flow of ideas and innovation is itself new and promising in the modern pursuit of a fair and sustainable future for all regions of our planet
