The Long 1968 in Hungary and Romania Adrian-George Matus, 2023-12-31 This book advances a local regional and comparative analysis of the history of the sixty eighters from Hungary and Romania between 1956 and 1975 The aim of the book is to answer to the following research question to what extent does the long 1968 mark and change protest history Another axis of my research equally important is how can one genuinely distinguish between a protest an opposition and a

pastime Where did radicalisation truly begin and when was it solely an auto perception as a dissident In other words how can one truly distinguish between a leisure activity like listening to Radio Free Europe or exploring an altered state of consciousness and an explicit political activity like organising a protest or writing subversive texts Among other aims the books scope is to understand where a leisure activity ends and a protest starts By practicing counterculture did the youth wish to contest the system or simply express themselves As method oral history plays a crucial part On a superficial level the interviews helped to fill in the archival gap However oral testimonies proved to reveal much more than essential factual information Oral history clarified how political and social events influenced the subjects memory formation **Viewpoints**
