The Almighty Machine Pekka Vahvanen,2022-02-25 The hymn of Digitalization is nothing new We must encourage the creation of new apps We must develop AI in order to prevail among international competition Technology s advance will halt climate change and let robots do the dumb stuff for us Our faith in technology is powerful because it has saved us in the past The Almighty Machine shows us technology s flip side The things that once powered us toward a brighter tomorrow are already undermining our quality of life The data stream has shattered our concentration human relationships have been reduced to a menu of emojis constant surveillance has nullified much of our privacy and the development of AI could be the beginning of the end for us We are becoming the casualties of our own success Pekka Vahvanen s bristling and timely critique deftly translated by Mark Jones throws doubt on the necessity of technological development in a world saturated in tech The Almighty Machine presents an important question Does progress no longer make us happier **American Photo**

Four Battlegrounds Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of Burn In An award winning defense expert tells the story of today's great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing

technology and dominate the future Four Battlegrounds argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre s account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China s National Team of leading AI companies to show the chilling synergy between China s government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order **The De Gruyter**

Handbook of Automated Futures Vaike Fors,Martin Berg,Meike Brodersen,2024-09-23 How does automation affect us our environment and our imaginations What actions should we take in response to automation Beyond grand narratives and technology driven visions of the future what more can automation offer With these questions in mind The De Gruyter Handbook of Automated Futures provides a framework for thinking about and implementing automation differently It consolidates automated futures as an inter and transdisciplinary research field embedding the imaginaries interactions and impacts of automation technology within their social historical societal cultural and political contexts Promoting a critical yet constructive and engaging agenda the handbook invites readers to collaborate with rather than resist automation agendas It does so by pushing the agenda for social science humanities and design beyond merely assessing and evaluating existing technologies Instead the handbook demonstrates how the humanities and social sciences are essential to the design and governance of sustainable sociotechnical systems Methodologically the handbook is underpinned by a pedagogical approach to staging co learning and co creation of automated futures with rather than simply for people In this way the handbook encourages readers to explore new and alternative modes of research fostering a deeper engagement with the evolving landscape of automation **The REAL Social Compact, Form #08.030** Sovereignty Education and Defense Ministry

An Enchantment of Digital Archaeology Shawn Graham, 2020-07-01 The use of computation in archaeology is a kind of magic a way of heightening the archaeological imagination Agent based modelling allows archaeologists to test the just so stories they tell about the past It requires a formalization of the story so that it can be represented as a simulation researchers are then able to explore the unintended consequences or emergent outcomes of stories about the past Agent based models are one end of a spectrum that at the opposite side ends with video games This volume explores this spectrum in the context of Roman archaeology addressing the strengths weaknesses and opportunities of a formalized approach to computation and archaeogaming *The Times Index* , 2011 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement
