Researching Social Media with Children Antonio Silva Esquinas, Jorge Ramiro Pérez Suárez, Raquel Rebeca Cordero Verdugo, Julio Díaz Galán, 2024-08-01 Reflecting on the methodological issues involved in researching digital spaces with children this book shares good practices and delves into the ethics of such research Social media has completely redefined how children and young people relate to each other express themselves and present their identities and sexualities Yet researching social media can be a difficult and daunting task given the ephemerality of the content its contextual hyperspecificity the complex power relationships between users celebrity culture digital capitalism and the ethical issues that arise from the reimagining of the public private space Using digital ethnography and creative digital storytelling workshops with children and young people aged 13 15 and 13 18 on TikTok Instagram and Twitch this book studies their interactions language codes the risks they take and the victimizations they suffer *Researching Social Media with Children* will be of use to social scientists conducting online research and to students and scholars of media studies digital criminology psychology and sociology The authors draw on experiences from studies carried out in Spain on children and social media by the Knowledge Research Group on Social Problems at Universidad Europea de Madrid

Building a God Christopher DiCarlo, 2025-01-21 Renowned ethicist provides essential guide to successfully navigating the future AI landscape In *Building a God* Christopher DiCarlo explores the profound implications of artificial intelligence surpassing human intelligence a destiny that seems not just possible but inevitable At this critical crossroad in our evolutionary history DiCarlo a renowned ethicist in AI delves into the ethical mazes and technological quandaries of our future interactions with superior AI entities From healthcare enhancements to the risks of digital manipulation this book scrutinizes AI's dual potential to elevate or devastate humanity DiCarlo advocates for robust global governance of AI proposing visionary policies to safeguard our society AI will positively impact our lives in myriad ways from healthcare to education manufacturing to sustainability AI powered tools will improve productivity and add ease to the most massive global industries and to our own personal daily routines alike But we have already witnessed the tip of the iceberg when it comes to the risks of this new technology AI algorithms can manipulate human behavior spread disinformation shape public opinion and impact democratic processes Sophisticated technologies such as GPT 4 Dall E 2 and video Deepfakes allow users to create distort and alter information Perhaps more troubling is the foundational lack of transparency in both the utilization and design of AI models What ethical precepts should be determined for AI and by whom And what will happen if rogue abusers decide not to comply with such ethical guidelines How should we enforce these precepts Should the UN develop a Charter or Accord which all member states agree to and sign off on Should governments develop a form of international regulative body similar to the International Atomic Energy Agency IAEA which regulates not only the use of nuclear energy but nuclear weaponry as well In this incisive and cogent meditation on the future of AI DiCarlo argues for the ethical governance of AI by identifying the

key components obstacles and points of progress gained so far by the global community and by putting forth thoughtful and measured policies to regulate this dangerous technology
