from the author's own life complimented by commentaries that place these vignettes into a broader socio-political context. The intended result is a more balanced view of this time in history. In Part Two the author draws a portrait of more recent times and endeavors to predict what lies ahead for all of us in the Age of AI. In 1945 the technologies on the white magic side of the scientific spectrum contributed to the unprecedented prosperity of the half century of America's purported Golden Age. In 2025 the author posits that the soon to be dominant technology we have labeled Generative Artificial Intelligence poses an existential threat to our prosperity and our democracy but also the potential following a likely period of wrenching trials and tribulations for a new Golden Age.
