**The Fourth Intelligence Revolution** Anthony Vinci, 2025-10-28 A former senior intelligence officer reveals how espionage is being transformed by a new global intelligence race driven by AI and competition with China and how this impacts all of our lives The new global intelligence competition has brought espionage into our workplaces and our living rooms Adversaries like China Iran and Russia have realized that the human element is the weakest link in our industrial and political infrastructure As a result they target all of us stealing our financial data and medical records eavesdropping on our conversations and using platforms like TikTok and Hollywood movies to influence our opinions The Fourth Intelligence Revolution reveals how the undercover adventures of World War II the spy versus spy confrontations of the Cold War and the find fix and finish counterterrorism missions after 9 11 have given way to the most dangerous period of espionage yet This eye opening account exposes how intelligence now permeates every corner of society from economic espionage and genetic data gathering to information operations targeting children through AI chatbots even extending to reconnaissance on the far side of the moon Both a warning and a call to action The Fourth Intelligence Revolution suggests that we are all in essence becoming intelligence officers and that citizens have both the power and responsibility to reclaim intelligence to safeguard and strengthen our democracy

**The Long Game: Sustaining a Successful Career in Teaching** Peter Foster, 2024-12-31 Why do some teachers stay in teaching And why do others leave Why do some enjoy it whilst others find it an unrelenting slog Answers to these questions are elusive but vital for new teachers school leaders and everyone in between Using research from wide ranging fields and experience from real teachers The Long Game examines how teachers can sustain and enjoy successful careers in teaching Divided into five parts the book explores the persistent challenges of being a teacher by breaking them down into problems and solutions The chapters unpack the factors that get in the way of our success or enjoyment of teaching and considers the different ways these problems can be tackled addressing key concerns including How to maintain motivation as you juggle work and life How to manage intensity in a non stop job How to embed effective long lasting habits to save time and mental effort How to reduce workload not just manage it How to teach successfully and have impact in a way that lasts Teaching isn t like a game because it is frivolous or simple But it is an infinitely layered problem we can spend our careers trying to solve To sustain a successful and enjoyable career in teaching we need to embed strategies and approaches that will minimise the challenges and maximise our enjoyment The Long Game will help teachers to hold onto the joy in teaching by facing the challenges head on
