Focusing on how consultancy firms can innovate in the modern era, it exposes and discusses key drivers for innovation in the industry. These are broken down into 5 dimensions or Poles relating to forms of capital: human capital, social capital, and three types of organizational capital that consultancy firms can use in order to innovate both for themselves and for their clients. Readers of this book will not only gain insight into the innovative consultancy from the perspective of each of these Poles. They will also discover how consultancy firms need to find the right way of connecting these Poles together in order to produce the desired innovation. Readers will learn about the dangers of misaligning the Poles, as well as implications of innovative consultancy for ethics, academic research in the field of consultancy, and for careers. In addition to the academic literature, the book draws from real-world examples, cases, and practice insights from various parts of the world.
