Handbook of Research on Challenges for Human Resource Management in the COVID-19 Era Figueiredo, Paula Cristina Nunes, Tomé, Eduardo Luís de Campos Soares, Rouco, José Carlos Dias, 2022-06-10

The importance of people in organizations has been growing in the organizational environment over the last decades. Digital transformation, artificial intelligence, and sustainability have already reinforced the role of people as a differentiating element for the success and survival of organizations. These phenomena alone are already challenging for people. There is a consensus that the world of work as we knew before the pandemic will not return. Human resource management (HRM) practices must prepare organizations for the future of work. The Handbook of Research on Challenges for Human Resource Management in the COVID 19 Era analyzes state of the art HRM in a digital transformation context and investigates the factors that promote more learning and development dynamics in organizational contexts. It also evaluates the impact of HRM policies on individuals, organizations, and societies. Covering topics such as corporate social responsibility, job satisfaction, and electronic performance monitoring, this major reference work is a crucial resource for leaders from public and private companies, human resource professionals, specialists, students, and educators of higher education, researchers, and academicians.

Sociology, Work, and Organisations Brian McDonough, Jane Parry, 2024-10-23. This accessible edited collection provides global context for undergraduate and postgraduate students studying the sociology of work and organisations. Composed of short example-led chapters, this book covers a wide range of contemporary topics including the COVID 19 pandemic, the digitalisation of work, the gig economy, and the shifting roles of women and other marginalised groups. The book's innovative approach uses case studies as diverse as work-life balance in China, gender pay inequity in Britain and Germany, and the exploitation of workers on the Mexico-US border to incorporate perspectives from both the Global North and South, and provide students with the tools to analyse new developments in the rapidly changing world of work. The book is particularly concerned with inequalities and marginalisation in the workplace, discussing discrimination against women, ethnic minorities, migrants, and older workers. The book also explores how increasing digitalisation, the rise of the gig economy, and the COVID 19 pandemic have impacted working practices and how this relates to precarious employment. Other chapters are dedicated to issues of workplace organisation, including female leadership, work-life balance, and well-being. The book goes on to explore how climate change and policies such as Universal Basic Income may shape the future of work in the near future. Each chapter also includes useful pedagogical resources, including practice exam questions, key concepts and definitions, and further readings. Therefore, the book will be essential reading for undergraduate and postgraduate students studying the sociology of work, business management, and organisation.
