Flynn Coleman, 2019-10-01 A groundbreaking narrative on the urgency of ethically designed AI and a guidebook to reimagining life in the era of intelligent technology The Age of Intelligent Machines is upon us and we are at a reflection point The proliferation of fast moving technologies including forms of artificial intelligence akin to a new species will cause us to confront profound questions about ourselves The era of human intellectual superiority is ending and we need to plan for this monumental shift A Human Algorithm How Artificial Intelligence Is Redefining Who We Are examines the immense impact intelligent technology will have on humanity These machines while challenging our personal beliefs and our socioeconomic world order also have the potential to transform our health and well being alleviate poverty and suffering and reveal the mysteries of intelligence and consciousness International human rights attorney Flynn Coleman deftly argues that it is critical that we instill values ethics and morals into our robots algorithms and other forms of AI Equally important we need to develop and implement laws policies and oversight mechanisms to protect us from tech s insidious threats To realize AI s transcendent potential Coleman advocates for inviting a diverse group of voices to participate in designing our intelligent machines and using our moral imagination to ensure that human rights empathy and equity are core principles of emerging technologies Ultimately A Human Algorithm is a clarion call for building a more humane future and moving conscientiously into a new frontier of our own design Coleman argues that the algorithms of machine learning if they are instilled with human ethics and values could bring about a new era of enlightenment San Francisco Chronicle *Welcome*

to the Future Kathryn Hulick, 2021-10-26 Have you ever wondered what the future may look like In this book you ll explore 10 ways technology could alter our way of life The challenge for you is to decide which changes you want for yourself and the world In the future will we teleport from place to place keep dinosaurs as pets or 3D print our dinner Will we live on Mars or upload our brains to computers Could we solve climate change by making all our energy from mini stars we build here on earth This fascinating and thought provoking book from science writer Kathryn Hulick explores the possible futures humanity will face and how we will live as the world around us changes beyond our recognition From genetic engineering and building floating colonies in space to developing telepathic technology and bionic body alterations this engagingly illustrated book looks into the possible future technologies which will shape how we live and how we adapt to the challenges of the future In this book you ll meet the scientists working to bring science fiction to life and learn how soon we might have amazing new technology You ll also delve deep into questions about right and wrong Just because we can do something doesn t mean we should How can we build the best possible future for everyone on Earth **The Actual Jesus** Tina Pippin, 2025-07-29 This book moves away from the traditional historical and theological studies of Jesus to incorporate a variety of theoretical and material approaches across centuries and diverse global cultures Through fiction and film the connections are made with contemporary issues such as borders asylum seekers farmworker activism colonialism violence misogyny civil war and nuclear proliferation with a focus on the appearances of the actual Jesus in these worlds The Jesus in this study is explored in particular connections with the stories of baptism wilderness experience ascension and apocalypse What is found is often confusing challenging surprising and disturbing like the Jesus of the gospels **Science** John Michels (Journalist), 2010

Empire of AI Karen Hao, 2025-05-20 An Instant New York Times Bestseller A bestselling page turner that has made waves not just in Silicon Valley but around the world With *Empire of AI* Hao is fundamentally shaping many people s perceptions and understanding of the company at the center of the AI revolution TIME Magazine TIME100 AI 2025 Excellent and deeply reported Tim Wu The New York Times Startling and intensely researched an essential account of how OpenAI and ChatGPT came to be and the catastrophic places they will likely take us Vulture Hao s reporting inside OpenAI is exceptional and she s persuasive in her argument that the public should focus less on AI s putative sentience and more on its implications for labor and the environment Benjamin Wallace Wells New Yorker From a brilliant longtime AI insider with intimate access to the world of Sam Altman s OpenAI from the beginning an eye opening account of arguably the most fateful tech arms race in history reshaping the planet in real time from the cockpit of the company that is driving the frenzy When AI expert and investigative journalist Karen Hao first began covering OpenAI in 2019 she thought they were the good guys Founded as a nonprofit with safety enshrined as its core mission the organization was meant its leader Sam Altman told us to act as a check against more purely mercantile and potentially dangerous forces What could go wrong Over time Hao began to wrestle ever more deeply with that question Increasingly she realized that the core truth of this massively disruptive sector is

that its vision of success requires an almost unprecedented amount of resources the compute power of high end chips and the processing capacity to create massive large language models the sheer volume of data that needs to be amassed at scale the humans cleaning up that data for sweatshop wages throughout the Global South and a truly alarming spike in the usage of energy and water underlying it all The truth is that we have entered a new and ominous age of empire only a small handful of globally scaled companies can even enter the field of play At the head of the pack with its ChatGPT breakthrough how would OpenAI resist such temptations Spoiler alert it didn't Armed with Microsoft's billions OpenAI is setting a breakneck pace chased by a small group of the most valuable companies in human history toward what end not even they can define All this time Hao has maintained her deep sourcing within the company and the industry and so she was in intimate contact with the story that shocked the entire tech industry Altman's sudden firing and triumphant return The behind the scenes story of what happened told here in full for the first time is revelatory of who the people controlling this technology really are But this isn't just the story of a single company however fascinating it is The g forces pressing down on the people of OpenAI are deforming the judgment of everyone else too as such forces do Naked power finds the ideology to cloak itself no one thinks they're the bad guy But in the meantime as Hao shows through intrepid reporting on the ground around the world the enormous wheels of extraction grind on By drawing on the viewpoints of Silicon Valley engineers Kenyan data laborers and Chilean water activists Hao presents the fullest picture of AI and its impact we've seen to date alongside a trenchant analysis of where things are headed An astonishing eyewitness view from both up in the command capsule of the new economy and down where the real suffering happens Empire of AI pierces the veil of the industry defining our era *The Podcaster's Audio Handbook* Corey Marie Green,2021 Podcasting is a powerful tool of communication and creative expression that doesn't need to be intimidating This book brings together the creative and technical aspects of audio engineering to help podcasters communicate their ideas effectively and creatively The Podcaster's Audio Handbook focuses on simple techniques that immediately elevate the audio quality of your podcast The book provides an overview of podcast recording and editing techniques so that podcasters can avoid common pitfalls Readers will also gain access to audio downloads to enhance the learning process With this book you can improve the technical aspects of recording and editing your podcasts Anyone can learn audio techniques and I encourage anyone to share their stories through podcasting Unleash your creativity and connect with your audience What You Will Learn Choose the correct file formats and settings Set up a portable recorder Make informed decisions about equipment purchases Find suitable acoustic spaces to record inside and outside Conduct an interview over the phone and the internet Make a high quality recording of an interview inside outside and remotely Edit your podcast to an intermediate standard Who This Book Is For Perfect for a non technical audience or beginner to intermediate podcaster looking to improve the audio quality of their podcast **Reader Bot** Naomi S. Baron,2026-01-20 What happens to human reading when AI bots can do it for us Explosive developments in artificial intelligence have awed

everyday users with the technology's ability to draw on computer coding and especially to write. Those AI-generated essays and poems, legal briefs and responses to requests for information are all visible evidence of large language models at work. What we don't see is the critical prior step before it can write: AI needs to read. While AI's written outcomes are remarkably similar to what a diligent student, lawyer or researcher might produce, AI doesn't read the way that humans do. Now that AI is proving an adept reader, what happens to our own reading skills and motivations, especially at a time when both voluntary and school reading are increasingly on the decline? We have learned that when we let chatbots write for us, there are pros and cons to handing over our virtual pens. It's critical that we also think through the consequences of relinquishing reading, a deeply human activity, to bots. What do we stand to gain and lose when we let AI read for us? Tracing the intersecting trajectories of AI and reading, *Reader Bot* tackles this vital question, revealing why we must be thoughtful about how we welcome AI as reader into our lives.

Empire of AI Karen Hao, 2025-05-20 A NEW YORK TIMES BESTSELLER An eye-opening account of the tech arms race shaping our planet from an award-winning journalist and AI insider to the world of Sam Altman and OpenAI. When longtime AI expert and journalist Karen Hao first began covering OpenAI in 2019, she thought they were the good guys. Founded as a nonprofit with safety enshrined as its core mission, it was meant. Its leader, Sam Altman, told us to act as a check against more purely market forces. But the core truth of this massively disruptive sector is that it requires an unprecedented amount of proprietary resources: the compute power of scarce, high-end chips; the sheer volume of data that needs to be amassed at scale; the humans on the ground cleaning it up for sweatshop wages throughout the Global South; and a truly alarming spike in the need for energy.

and water underlying everything We have entered a new ominous age of empire with OpenAI setting a breakneck pace as a small group of the most valuable companies in human history try to chase it down In exhilarating prose and with unparalleled access to those closest to Sam Altman Hao recounts the meteoric rise of OpenAI and shows us the sinister impact that this industry is having on society
