*Time Perception Science* Michael Brown,AI,2025-02-23 Time Perception Science explores the fascinating ways our brains construct our subjective experience of time It examines how neural mechanisms and cognitive processes work together influencing everything from planning to social interactions One intriguing fact is that our perception of time isn t passive it s actively shaped by factors like attention and emotion This book uniquely emphasizes the dynamic interplay of various brain regions rather than pinpointing a single time center The book progresses systematically first laying the groundwork with historical and philosophical perspectives It then delves into the neuroscience of time perception exploring brain regions and neural oscillations Next it examines cognitive and psychological influences such as how conditions like Parkinson s disease can alter time perception By integrating findings from neuroscience psychology and cognitive science Time Perception Science offers a comprehensive understanding of how we experience time including how our brains process temporal information

**The Palgrave Handbook of Applied Creativity in Global Higher Education** Gerard J. Puccio,Amanda Lohiser,Camille A. McKayle,Frederik Hertel,2025-09-30 This handbook explores how colleges and

universities worldwide are fostering creativity as an essential skill for success in today's complex and fast-changing world. Featuring over 30 case studies, this volume presents innovative curricula, certificates, degrees, and initiatives designed to equip students with the creative thinking and problem-solving skills demanded in today's workplace. Despite the growing recognition of creativity as a crucial life and work skill, few institutions explicitly offer programs to cultivate it. This volume bridges that gap, presenting real-world examples from faculty who have developed applied creativity programs and first-hand student testimonials that describe their transformative impact. Drawing from psychology, business, and education research, this book demonstrates that creativity is not just an innate talent but a teachable, trainable expertise. Essential reading for educators, administrators, and policymakers, this book provides practical insights into designing programs and institution-wide strategies that empower students to navigate uncertainty, drive innovation, and thrive in an ever-evolving global landscape.

Fish Out of Water Kikanza Nuri-Robins, Lewis Bundy, 2016-04-07 Sometimes people just don't fit in. They may not be a member of the dominant group; they may not have figured out the norms of the dominant culture; or members of the dominant culture may not realize that the organization's culture is marginalizing. As advocates for social justice, it is important to notice and teach the cultural codes, the house rules that contribute to success in a particular environment and to dismantle the codes within those environments that target, marginalize, or exclude. This book is helpful for managers who are working to create and sustain a healthy organization culture. Mentors of children who are targeted by their peers or other adults. People who want to make a difference in their environment and have not yet figured out the rules for doing that. What people are saying: Fish Out of Water is a great resource for navigating ponds that suffocate the marginalized with dominant norms and values. Linking Cultural Proficiency to decoding an environment provides more tools for code-switching, code-sharing, and conversations about making students and families feel welcomed, included, and safe in our schools. Angela Ward, Office of Cultural Proficiency Inclusion, Austin Independent Schools, TX. This book made me think: It is a courageous attempt at the difficult subject of who doesn't fit into the spaces and places we inhabit and why. But the most valuable part of this book is that it describes what we can do about making our schools, workplaces, and communities more inclusive and ultimately more effective. Nicki King, Reducing Mental Health Disparities Project, University of California, Davis.
