Artificial Intelligence in Radiology, An Issue of Radiologic Clinics of North America, E-Book Daniel L. Rubin, 2021-10-27
Artificial Intelligence in Radiology An Issue of Radiologic Clinics of North America E Book **Data-centric Living V. Sridhar**, 2021-11-29 This book explores how data about our everyday online behaviour are collected and how they are processed in various ways by algorithms powered by Artificial Intelligence AI and Machine Learning ML The book investigates the socioeconomic effects of these technologies and the evolving regulatory landscape that is aiming to nurture the positive effects of these technology evolutions while at the same time curbing possible negative practices The volume scrutinizes growing concerns on how algorithmic decisions can sometimes be biased and discriminative how autonomous systems can possibly disrupt and impact the labour markets resulting in job losses in several traditional sectors while creating unprecedented opportunities in others the rapid evolution of social media that can be addictive at times resulting in associated mental health issues and the way digital Identities are evolving around the world and their impact on provisioning of government services The book also provides an in depth understanding of regulations around the world to protect privacy of data subjects in the online world a glimpse of how data is used as a digital public good in combating Covid pandemic and how ethical standards in autonomous systems are evolving in the digital world A timely intervention in this fast evolving field this book will be useful for scholars and researchers of digital humanities business and management internet studies data sciences political studies urban sociology law media and cultural studies sociology cultural anthropology and science and technology studies It will also be of immense interest to the general readers seeking insights on daily digital lives

Automating Crime Prevention, Surveillance, and Military Operations Aleš Završnik, Vasja Badalič, 2021-08-19 This interdisciplinary volume critically explores how the ever increasing use of automated systems is changing policing criminal justice systems and military operations at the national and international level The book examines the ways in which automated systems are beneficial to society while addressing the risks they represent for human rights This book starts with a historical overview of how different types of knowledge have transformed crime control and the security domain comparing those epistemological shifts with the current shift caused by knowledge produced with high tech information technology tools such as big data analytics machine learning and artificial intelligence The first part explores the use of automated systems such as predictive policing and platform policing in law enforcement The second part analyzes the use of automated systems such as algorithms used in sentencing and parole decisions in courts of law The third part examines the use and misuse of automated systems for surveillance and social control The fourth part discusses the use of lethal semi autonomous weapons systems in armed conflicts An essential read for researchers politicians and advocates interested in the use and potential misuse of automated systems in crime control this diverse volume draws expertise from such fields as criminology law sociology philosophy and anthropology **Mind-Reading and Artificial Intelligence: Past, Present and Future** Prof.

(Dr.) Jai Paul Dudeja, 2024-10-30 Mind reading typically refers to the ability of discerning or interpreting someone else's thoughts, feelings, or intentions. Mind Reading has two components: human-based and ii device-based artificial intelligence. Artificial Intelligence (AI) refers to programming computers to do tasks that normally require human intelligence, like learning, problem-solving, and understanding language. It is like giving computers the ability to think and make decisions on their own, similar to how humans do. AI helps machines learn from data, adapt to new situations, and perform tasks without being explicitly programmed for each step. This book covers the topics on human-based and device-based mind reading and interpretation of artificial intelligence, which is divided into 32 chapters and the following 8 sections: i Mind Reading and Artificial Intelligence Introduction and Overview, ii Human-Based Mind Reading, iii Artificial Intelligence Introduction, Types of Learning, iv Device-Based Mind Reading And Virtual Assistants, v Applications and Opportunities of Artificial Intelligence, vi Artificial Intelligence Ethical Issues, Risks, and Regulations, vii Artificial Consciousness, and viii Artificial Intelligence in India: Status and the Way Forward.

Digitalization and Artificial Intelligence in Courts, 2025-09-25 In an era of rapid technological advancement, justice systems around the world stand at the threshold of a profound transformation. Digitalization and artificial intelligence offer unprecedented opportunities to enhance efficiency, broaden access to legal remedies, and bring courts closer to citizens. Yet as judicial processes become increasingly digitalized and automated, critical questions arise: how can we ensure transparency, fairness, and accountability in online dispute resolution (ODR) and AI-driven systems? What protections must be in place to preserve privacy, uphold fundamental rights, and ensure that technology serves rather than undermines the core principles of justice? Positioned at the intersection between technology and justice, **Digitalization and Artificial Intelligence in Courts: Opportunities and Challenges** explores these questions. The first part of the volume considers strategies for bridging the digital divide, explores the potential for process pluralism, outlines data protection requirements, and emphasizes the necessity of robust cybersecurity frameworks. It also tackles one of the most pressing concerns of the digital era: fostering trust and legal certainty in a virtual justice system. The second part presents a comparative analysis of selected groundbreaking national and cross-border court digitalization initiatives from England and the United States to China, Pakistan, and the European Union. The final part examines the role of AI in courts, offering a critical reflection on its promises and perils, from algorithmic bias to the controversial concept of AI judges. Through a rigorous and balanced analysis, the authors map the opportunities and challenges of an increasingly digitalized legal landscape. Essential for legal professionals, policymakers, and scholars, **Digitalization and Artificial Intelligence in Courts** serves as a fundamental guide to navigating the future of justice systems and technology in the twenty-first century. Includes a foreword by Lord Briggs of Westbourne, Justice of the Supreme Court of the United Kingdom.

History of Ideology Ylia Callan, 2025-09-06 **History of Ideology: Beyond AI Capitalism** is a bold and sweeping exploration of humanity's economic journey from the first hunter-gatherer bands to the rise of agriculture, to the ascent of capitalism, and now to the dawn of

artificial intelligence As AI and automation disrupt every industry the old equation of work for wages wages for survival is beginning to collapse This book argues that capitalism while revolutionary in its time has reached its limits on a finite planet Endless growth resource extraction and privatisation of the commons can no longer sustain human well being nor can they survive the technological shockwave that is eliminating the very jobs capitalism depends on Instead of painting a picture of doom History of Ideology offers a hopeful practical vision for what comes next It calls for a new compass beyond GDP one that measures human flourishing rather than raw production It explores tools such as Universal Basic Income sovereign wealth funds platform cooperatives and data trusts as the building blocks of a post capitalist economy And it imagines a future where purpose creativity environmental restoration and care work become the centre of human life This is a book about history technology and economics but ultimately it is a book about choice The future is not something that happens to us It is something we build *Annual Workshop on Space Operations Automation and Robotics (SOAR ...)* ,1987

technologies has caused great harm to students by subjecting them to oppressive levels of surveillance impinging upon their right to privacy and harvesting their personal data on behalf of Big Tech In doing so the authors draw upon interviews from K 12 and higher education students teachers and staff civil rights and technology lawyers and educational technological programmers The authors also provide practical guidance for teachers administrators students and their families seeking to identify and combat surveillance in education This urgent eye opening book will be of interest to students and educators with interests in critical media literacy and pedagogy and the sociology of technology and education
