Takashi Murakami's brightly colored cartoonlike characters or with Junko Mizuno's grotesque cute Lolita style girls. Perhaps less familiar are the absurd fighting machines of Kenji Yanobe, the many disguises of Tomoko Sawada, or the grotesque fairytale landscapes of Tomoko Konoike. *Warriors of Art* features the work of forty of the latest and most relevant contemporary Japanese artists, from painters and sculptors to photographers and performance artists, with lavish full color spreads of their key works. Author Yumi Yamaguchi offers an insightful introduction to the main themes of each artist and builds up a fascinating portrait of the society that has given birth to them: a Japan that still bears the scars of atomic destruction, a Japan with a penchant for the cute and the childish, a Japan whose manga and anime industries have come to dominate the world. *Warriors of Art* takes its title from a phrase used to describe Taro Okamoto, 1911-1996, perhaps the first truly influential contemporary artist to emerge in postwar Japan, who fought to bring modern art to a wider audience. Following in Okamoto's footsteps, the forty artists featured in this book are a new generation of warriors attacking our senses with a shocking mix of the cute, the grotesque, the sexy, and the violent, forcing us to sit up and take notice of their vision of Japan.

Race After Technology Ruha Benjamin, 2019-07-09 From everyday apps to complex algorithms, Ruha Benjamin cuts through tech industry hype to understand how emerging technologies can reinforce White supremacy and deepen social inequity. Benjamin argues that automation, far from being a sinister story of racist programmers scheming on the dark web, has the potential to hide, speed up, and deepen discrimination while appearing neutral and even benevolent when compared to the racism of a previous era. Presenting the concept of the New Jim Code, she shows how a range of discriminatory designs encode inequity by explicitly amplifying racial hierarchies, by ignoring but thereby replicating social divisions, or by aiming to fix racial bias but ultimately doing quite the opposite. Moreover, she makes a compelling case for race itself as a kind of technology designed to stratify and sanctify social injustice in the architecture of everyday life. This illuminating guide provides conceptual tools for decoding tech promises with sociologically informed skepticism. In doing so, it challenges us to question not only the technologies we are sold but also the ones we ourselves manufacture. Visit the book's free Discussion Guide: www.dropbox.com.
