Proceedings of the Future Technologies Conference (FTC) 2025, Volume 2 Kohei Arai, **Research Advances in Data Mining Techniques and Applications**, 2024-05-02 For contemporary societies data mining has emerged as a serious challenge Thanks to more advanced analytical tools the Big Data explosion has enabled businesses to assess their performance more thoroughly and accurately For example transitioning from using a basic spreadsheet to using data lake modeling offers more flexibility in terms of consulting and summarizing vast amounts of data from many business angles Data mining which is the foundation for this optimization of data analysis has been strengthened by artificial intelligence and machine learning to find patterns in this deluge of data and build future prediction models turning it into a critical tool for decision making This book provides an understanding of the most modern techniques and uses for data mining It examines data mining in order to classify datasets predict outcomes and optimize analyses Furthermore the book demonstrates these technological developments by highlighting relevant applications of data mining in industry biology education medicine and health **Navigating Computer Science Education in the 21st Century** Bosch, Chantelle, Goosen, Leila, Chetty, Jacqui, 2024-02-26 Students often face challenges in a swiftly advancing Computer Science Education CSE where technologies evolve rapidly and concepts unfold with overwhelming intricacies As society becomes interwoven with technology how essential is the integration of CSE into the educational framework to adequately equip future generations for the complexities of the digital era Navigating Computer Science Education in the 21st Century advocates integrating CSE into curricula underlining its crucial role in early childhood development The book grapples with the challenge of introducing children to technology responsibly addressing concerns about unmonitored screen time while emphasizing the necessity of evidence based approaches for educators Within these pages effective teaching strategies are linked to successes in CSE The book explores learner centered teaching methodologies in computer science emphasizing individualized instruction active learning and collaborative approaches It evaluates the effectiveness of traditional lecture based teaching against more innovative strategies such as game based learning and collaborative approaches By presenting studies that delve into the impact of these strategies on student engagement and motivation the book equips educators with the insights needed to make informed decisions tailored to diverse learning environments **Learn AI-assisted Python Programming** Leo Porter, Daniel Zingaro, 2023-11-21 Writing computer programs in Python just got a lot easier Use AI assisted tools like GitHub Copilot to go from idea to application faster than you can say ChatGPT In Learn AI Assisted Python Programming With GitHub Copilot you ll learn how to Write fun and useful Python applications no programming experience required Use the Copilot AI coding assistant to create Python programs Write prompts that tell Copilot exactly what to do Read Python code and understand what it does Test your programs to make sure they work the way you want them to Fix code with prompt engineering or human tweaks Apply Python creatively to help out on the job Learn AI Assisted Python Programming With

GitHub Copilot is a beginner's guide that embraces AI as the future of coding. AI-assisted coding tools like GitHub Copilot and ChatGPT empower you to create useful Python applications without learning all the low-level details of a programming language. You'll hit the ground running as you write prompts that tell your AI assistant exactly what you want your programs to do. Along the way, you'll pick up the essentials of Python programming and practice the higher-level thinking you'll need to create working apps for data science automation and even video games. **Beyond Code** Daniel Plate, James

Hutson, 2025-09-02 AI-powered coding tools are revolutionizing software development, transforming programming from a specialized skill into an accessible educational practice across disciplines. This book investigates how tools such as Cursor AI, GitHub Copilot, and Replit's Ghostwriter are dismantling traditional barriers to entry for learners, particularly those from non-STEM backgrounds, by enabling natural language code generation, intelligent debugging, and interactive project-based learning. Bridging the gap between theoretical instruction and practical application, the book serves as both a guide and a critical framework for integrating generative AI into curricula. It highlights how these tools expand the boundaries of programming education by supporting interdisciplinary applications, from literary analysis to creative writing, thereby making coding relevant and actionable for students in the humanities and beyond. The book equips educators with the tools and strategies necessary to incorporate AI-assisted programming into diverse academic contexts by offering lesson plans and adaptable project models. This resource is essential for instructors seeking to demystify coding, promote inclusivity in technical learning, and reimagine the role of software literacy in the twenty-first-century classroom. *Knowledge*

Co-Construction in Online Learning Charlotte Nirmalani Gunawardena, Nick V. Flor, Damien M. Sánchez, 2025-04-09 Knowledge Co-Construction in Online Learning is a comprehensive foundational resource that explores the study of social construction of knowledge through platforms, social dynamics, and other aspects of today's technology-enhanced education. The interactive spaces from formal computer-supported collaborative learning settings to informal social media integrative environments that comprise asynchronous online learning offer a rich source of data for analyzing teaching and learning. How then can researchers and designers in educational technology, instructional design, the learning sciences, and beyond most effectively analyze the content and data generated by these complex co-creations of knowledge? Grounded in sociocultural and social constructivist theories of learning and driven by the globally renowned Interaction Analysis Model, this book applies statistical and computational methods to study the group interactions and social networks that yield newly constructed knowledge during virtual learning experiences. Its unique Social Learning Analytic Methods enhance the analysis of social dynamics that support knowledge construction, so often missing from mainstream learning analytics. Holistic and cyclical in its approach to online learning experiences, this essential volume, written for novice and experienced researchers, transcends the field's research paradigm conflicts, blends qualitative and quantitative approaches with new digital media tools, and exemplifies how research questions and designs can incorporate and automate evolving forms of inquiry.
