In Depth Ai Logo Maker For Beginners For Teens:

Designing Digital Experiences for Positive Youth Development Marina Umaschi Bers, 2012-03-02 Based on over a decade and a half of research this title aims to guide readers in the design of digital technologies to promote positive behaviours in children and teenagers

Digital Youth, Innovation, and the Unexpected Tara McPherson, 2008 How emergent practices and developments in young people's digital media can result in technological innovation or lead to unintended learning experiences and unanticipated social encounters Young people's use of digital media may result in various innovations and unexpected outcomes from the use of videogame technologies to create films to the effect of home digital media on family life This volume examines the core issues that arise when digital media use results in unintended learning experiences and unanticipated social encounters The contributors examine the complex mix of emergent practices and developments online and elsewhere that empower young users to function as drivers of technological change recognizing that these new technologies are embedded in larger social systems school family friends The chapters consider such topics as un equal access across economic racial and ethnic lines media panics and social anxieties policy and Internet protocols media literacy citizenship vs consumption creativity and collaboration digital media and gender equity shifting notions of temporality and defining the public private divide Contributors Steve Anderson Anne Balsamo Justine Cassell Meg Cramer Robert A Heverly Paula K Hooper Sonia Livingstone Henry Lowood Robert Samuels Christian Sandvig Ellen Seiter Sarita Yardi

The Feeling Economy Roland T. Rust, Ming-Hui Huang, 2021-01-19 As machines are trained to think many tasks that previously required human intelligence are becoming automated through artificial intelligence However it is more difficult to automate emotional intelligence and this is where the human worker's competitive advantage over machines currently lies This book explores the impact of AI on everyday life looking into workers adaptation to these changes the ways in which managers can change the nature of jobs in light of AI developments and the potential for humans and AI to continue working together The book argues that AI is rapidly assuming a larger share of thinking tasks leaving human intelligence to focus on feeling The result is the Feeling Economy in which both employees and consumers emphasize feeling to an unprecedented extent with thinking tasks largely delegated to AI The book shows both theoretical and empirical evidence that this shift is well underway Further it explores the effect of the Feeling Economy on our everyday lives in the areas such as shopping politics and education Specifically it argues that in this new economy through empathy and people skills women may gain an unprecedented degree of power and influence This book will appeal to readers across disciplines interested in understanding the impact of AI on business and our daily lives It represents a bold potentially controversial attempt to gauge the direction in which society is heading
