*AI Roman V. Yampolskiy, 2024-02-23* Delving into the deeply enigmatic nature of Artificial Intelligence AI AI Unexplainable Unpredictable Uncontrollable explores the various reasons why the field is so challenging Written by one of the founders of the field of AI safety this book addresses some of the most fascinating questions facing humanity including the nature of intelligence consciousness values and knowledge Moving from a broad introduction to the core problems such as the unpredictability of AI outcomes or the difficulty in explaining AI decisions this book arrives at more complex questions of ownership and control conducting an in depth analysis of potential hazards and unintentional consequences The book then concludes with philosophical and existential considerations probing into questions of AI personhood consciousness and the distinction between human intelligence and artificial general intelligence AGI Bridging the gap between technical intricacies and philosophical musings AI Unexplainable Unpredictable Uncontrollable appeals to both AI experts and enthusiasts looking for a comprehensive understanding of the field whilst also being written for a general audience with minimal technical jargon

*Robotic Technology, Artificial Intelligence and the 4IR Libraries* Adeyinka Tella, Omwoyo Bosire Onyancha, 2025-10-14 This book addresses the challenges associated with information

provided in the 4th Industrial Revolution 4IR and the attendant opportunities that arise for libraries and other information services. Robotic technology and artificial intelligence are key developments in the information age with tremendous impact on the way information is processed and used by both information professionals and users including information service providers such as librarians. Information professionals, practitioners, and users will find this book useful in their endeavor to use the emerging technologies to improve their operation and find and access specific information easily. It describes what needs to be done by librarians to stay relevant and functional in the wake of change and addresses the necessary new skills needed by information professionals to be able to deliver effective services in the 4IR. *Culturally Competent Kids*

Samantha Sweeney, 2025-05-06 A book for parents that provides a science-based framework for helping to raise CULTURALLY COMPETENT KIDS. This book is for the parent who knows that culture is important. It is for the parent who wants to teach their child about the world around them but doesn't know where to start. Let this book be your starting point and your guide. The goal of *Culturally Competent Kids* is to help you raise your children to become adults who respect and celebrate differences rather than simply tolerating them. Research shows that while biases begin to develop at age 6, their origins begin much earlier. Unfortunately, diversity and culture are treated as though they are grown-up concepts as if children don't recognize that diversity is all around them. Human beings naturally categorize, and your kids will develop preferences, prejudices, and opinions about people who are different from them. Therefore, it is important for parents to take an active role in helping their children see, understand, and develop their understanding of people and cultures that are different. As Dr. Sweeney says, "We don't have to all be friends or even like each other; we just have to treat each other with respect." This book provides a science-based framework with ideas and options to explore as you embark on this cultural competence journey with your kids and also with yourself. *Natural Language Processing in Action, Second Edition* Hobson Lane, Maria Dyshel, 2025-02-25 Develop your NLP skills from scratch. This revised bestseller now includes coverage of the latest Python packages: Transformers, the HuggingFace packages, and chatbot frameworks. *Natural Language Processing in Action* has helped thousands of data scientists build machines that understand human language. In this new and revised edition, you'll discover state-of-the-art NLP models like BERT and HuggingFace transformers, popular open-source frameworks for chatbots, and more. As you go, you'll create projects that can detect fake news, filter spam, and even answer your questions, all built with Python and its ecosystem of data tools. *Natural Language Processing in Action, Second Edition* is your guide to building software that can read and interpret human language. This new edition is updated to include the latest Python packages and comes with full coverage of cutting-edge models like BERT, GPT-J, and HuggingFace transformers. In it, you'll learn to create fun and useful NLP applications such as semantic search engines that are even better than Google chatbots that can help you write a book and a multilingual translation program. Soon, you'll be ready to start tackling real-world problems with NLP.
