Emotions Online Alan Petersen, 2022-12-30 Digital media have become deeply immersed in our lives, heightening both hopes and fears of their affordances. While the internet, mobile phones, and social media offer their users many options, they also engender concerns about their manipulations and intrusions. *Emotions Online* explores the visions that shape responses to media and the emotional regimes that govern people's engagements with them.

This book critically examines evidence on the role of digital media in emotional life. Offering a sociological perspective and using ideas from science and technology studies and media studies, it explores the dimensions and operations of the online emotional economy. Growing concerns about online harms and abuse, especially to children, deepfakes and other forms of image-based abuse, the role of hope in shaping online behaviours, digital well-being and its market, COVID-19's impacts on perceptions of digital media and Big Tech, growing challenges to centralised control of the internet and the implications for future emotional life. The book breaks new ground in the sociological study of digital media and the emotions. It reveals the dynamics of online emotional regimes, showing how deceptive designs and algorithm-driven technologies serve to attract and engage users. As it argues, digital media rely on the emotional labours of many people, including social media influencers and content moderators who make the internet seem smart. The book provides an invaluable overview of the evidence and debates on the role of digital media in emotional life and guidance for future research, policy and action.

Pivoting and Producing for Online TV Alexa Scarlata, 2025-05-02. The introduction and diffusion of international subscription video on demand (SVOD) services in the 2010s represented the most significant disruption of established national broadcast and pay-TV ecologies in their long history. Using an in-depth Australian case study, this book narrates this profound period of proliferation. It also considers how incumbent commercial networks, pay-TV providers and public service broadcasters developed into online TV providers, albeit in assorted ways. In so doing, it conceives of the early impact of online TV, 2015–2020, more broadly and acknowledges the role of both new and old TV players. The industry-wide shift towards online TV over this period also impacted existing television drama production cultures. SVOD services provided a fruitful avenue for the distribution of existing archives and slowly began to support the production of new Australian content with an increasingly global focus. However, the formal arrival of online TV certainly did not usher in the boom in original local television drama many anticipated. *Pivoting and Producing for Online TV: Australia's Transition* advances the macro-analysis of television production strategies. This book will be useful to students and researchers interested in media, film and cultural studies.
