Whether you're 9, 19, or 90, this playful, jargon-free book is packed with brain-boosting activities, unforgettable stories, colorful illustrations, and hilarious examples that make learning artificial intelligence a total blast. Incredible Benefits You'll Get Inside: Understand AI through silly games, creative sketches, and real-life stories. Teach kids to think critically about smart tech and privacy. Discover how AIs learn, make decisions, and even make mistakes. Help kids create their own imaginary robot sidekick. Use step-by-step guides to explore AI art, chatbots, and language tools. Spark creativity and problem-solving using lessons from machine thinking. Get proven conversation starters for tech-savvy family chats. Learn how cultures around the world interact with AI. Empower children with knowledge, not fear. Packed with tips, tricks, worksheets, and hands-on experiments. No jargon. No coding experience needed. Just clear, exciting content designed for learners as young as 9th grade and brilliant enough to impress the grownups, too. Get your copy today.

Design in the Era of Industry 4.0, Volume 1 Amaresh Chakrabarti, Vishal Singh, 2023-07-25 This book showcases cutting-edge research papers from the 9th International Conference on Research into Design (ICoRD 2023), the largest in India in this area, written by eminent researchers from across the world on design processes, technologies, methods, and tools, and their impact on innovation for supporting design for a connected world. The theme of ICoRD 23 has been *Design in the Era of Industry 4.0*. Industry 4.0 signifies the fourth industrial revolution. The first industrial revolution was driven by the introduction of mechanical power, such as steam and water engines, to replace human and animal labour. The second industrial revolution involved the introduction of electrical power and organised labour. The third industrial revolution was powered by the introduction of industrial automation. The fourth industrial revolution involves the introduction of a combination of technologies to enable connected intelligence and industrial autonomy. The introduction of Industry 4.0 dramatically changes the landscape of innovation, and the way design, the engine of innovation, is carried out. The theme of ICoRD 23, *Design in the Era of Industry 4.0*, explores how Industry 4.0 concepts and technologies influence the way design is conducted and how methods, tools, and approaches for supporting design can take advantage of this transformational change that is sweeping across the world. The book is of interest to researchers, professionals, and entrepreneurs working in the areas of industrial design, manufacturing, consumer goods, and industrial management who are interested in the new and emerging methods and tools for design of new products, systems, and services.

Robotics, AI, and Humanity Joachim von Braun, Margaret S. Archer, Gregory M. Reichberg, Marcelo Sánchez Sorondo, 2021-02-12 This open access book examines recent advances in how artificial intelligence (AI) and robotics have elicited widespread debate over their benefits and drawbacks for humanity. The emergent

technologies have for instance implications within medicine and health care employment transport manufacturing agriculture and armed conflict While there has been considerable attention devoted to robotics AI applications in each of these domains a fuller picture of their connections and the possible consequences for our shared humanity seems needed This volume covers multidisciplinary research examines current research frontiers in AI robotics and likely impacts on societal well being human robot relationships as well as the opportunities and risks for sustainable development and peace The attendant ethical and religious dimensions of these technologies are addressed and implications for regulatory policies on the use and future development of AI robotics technologies are elaborated *My City Links: September 2023 Issue* My City Links,2023-09-01
