investigates what would happen if a new financial world order took hold one in which global elites own everything and you own nothing and yet you are somehow happy When Carol Roth first heard that one of the World Economic Forum's predictions for 2030 was You will own nothing and be happy she thought it was an outlandish fantasy Then she researched it What she found was that a number of businesses governments and global elites share a vision of a future that sounds utopian Everyone will have everything they need and no one will own anything From declines in home and vehicle ownership to global inflation and government spending many of the trends of modern life reveal that a new world that is emerging one in which Western citizens by choice or by circumstance increasingly do not own possessions or accumulate wealth It's the perfect economic environment for the rich and powerful to solidify their positions and prevent anyone else from getting ahead In *You Will Own Nothing* Roth reveals how the agendas of Wall Street world governments international organizations socialist activists and multinational corporations like Blackrock all work together to reduce the power of the dollar and prevent millions of Americans from taking control of their wealth She shows why owning fewer assets makes you poorer and less free This book is essential guide to protecting your hard earned wealth for the coming generations

**Electronics in New Music** Claus-Steffen Mahnkopf, Frank Cox, Wolfram Schurig, 2006 As technical progress increasingly affects music the role of electronics is becoming ever more important The studio the equipment and the computer are increasingly becoming a fixed part of artistic self identity even among those composers who do not see themselves as straddling medial boundaries The spectrum has meanwhile expanded notably It extends from works with live electronics and electronic pieces to music and sound installations from interactive models and mixes media projects to newly developed instrumental resources algorithmic composition and sound synthesis have become at least as important as tape music Twelve artists from composers to creators of sound installations present their work in this volume These pieces were all created in recent years and represent the current state of technological options and their musical and artistic potential Mark Applebaum Sidney Corbett Frank Cox Georg Klein Claus Steffen Mahnkopf Chris Mercer Christoph Ogiermann Jo o Rafael Alexander Stankowski Steven Kazuo Takasugi Ian Willcock and Gerhard Winkler offer detailed analyses primarily of the technical aspects in relation to their respective poetic intentions Back cover *Points East*, 2003
