**HCI International 2023 - Late Breaking Papers** Helmut Degen,Stavroula Ntoa,Abbas Moallem,2023-11-25 This seven volume set LNCS 14054 14060 constitutes the proceedings of the 25th International Conference HCI International 2023 in Copenhagen Denmark in July 2023 For the HCCII 2023 proceedings a total of 1578 papers and 396 posters was carefully reviewed and selected from 7472 submissions Additionally 267 papers and 133 posters are included in the volumes of the proceedings published after the conference as Late Breaking Work These papers were organized in the following topical sections HCI Design and User Experience Cognitive Engineering and Augmented Cognition Cultural Issues in Design Technologies for the Aging Population Accessibility and Design for All Designing for Health and Wellbeing Information Design Visualization Decision making and Collaboration Social Media Creative Industries and Cultural Digital Experiences Digital Human Modeling Ergonomics and Safety HCI in Automated Vehicles and Intelligent Transportation Sustainable GreenSmart Cities and Smart Industry eXtended Reality Interactions Gaming and Gamification Experiences Interacting with Artificial Intelligence Security Privacy Trust and Ethics Learning Technologies and Learning Experiences eCommerce Digital Marketing and eFinance      Cybersecurity in the Age of Artificial Intelligence Pasi Koistinen,2025-07-12 Artificial intelligence has stopped knocking politely on the door of cybersecurity it has kicked it open set up shop inside and begun rewriting the rules From generative phishing emails indistinguishable from trusted colleagues to adaptive malware that evolves faster than defenders can react AI has made the threat landscape faster smarter and far less predictable This book is

a practical guide to that unsettling reality It doesn't trade in hype or hand waving optimism Instead it lays out in plain language how AI systems create new risks what happens when security practices built for deterministic software fail and why human vigilance and organizational discipline are more important than ever Inside you'll discover How attackers are already using AI to automate reconnaissance generate malicious code and industrialize social engineering at a scale no human team could match Why defending AI is a fundamentally different challenge with attack surfaces embedded in training data model weights and seemingly innocuous prompts How familiar safeguards like static rules perimeter defenses and blacklists fall apart when faced with systems that learn infer and sometimes hallucinate What it takes to design secure trustworthy AI systems from threat modeling and auditing pipelines to deploying explainable models that don't sacrifice accountability for convenience Written for security leaders engineers policymakers and technologists who recognize that the convergence of AI and cybersecurity isn't theoretical it's already operational this book offers a strategic roadmap for navigating a landscape where yesterday's defenses are no longer enough You'll explore real world case studies chatbots leaking confidential data with alarming politeness AI driven phishing campaigns that slip past even well trained employees and defensive models that fail silently because they can't explain their own reasoning Along the way you'll learn frameworks to separate the promising from the perilous the actionable from the aspirational Artificial Intelligence Cybersecurity isn't a manual for fine tuning models or a primer for beginners It assumes you already sense that something is shifting and provides the clarity examples and strategies to respond If you're responsible for securing critical systems or shaping the policies that govern them this book will help you ask better questions make better decisions and avoid the costly mistake of treating AI as just another line item in your technology stack Because in this new era the question isn't whether AI will reshape your security strategy The question is whether you'll be ready when it does
