Coping with Africa's Refugee Burden: A Time for Solutions Robert F. Gorman, 2024-12-09 **Coping With Africa's Refugee Burden** Robert F. Gorman, 1987-04-14 **The Developing World and the Environment** Rajendra Ramlogan, 2004-09-28

The seeds of the demise of many early civilizations Mesopotamian Greek Roman and Mayan found fertile ground in environmental conflicts The roots of environmental crises are also embedded in the industrial revolution the advent of the age of science and technology urbanization changes in agriculture the population explosion and the rise in consumerism It is no surprise that even today the global village is highly concerned with the issue of environmentalism In this study author Rajendra Ramlogan calls for a re examination of the legal and institutional framework for protection of the global environment within the context of the special needs of the developing world This unique third world perspective on international environmental law is suitable for college level courses

Beyond Charity Gil Loescher, 1993 With more than 18 million refugees worldwide the refugee problem has fostered an intense debate regarding what political changes are necessary in the international system to provide effective solutions in the 1990s and beyond In the past refugees have been perceived largely as a problem of international charity but as the end of the Cold War triggers new refugee movements across the globe governments are being forced to develop a more systematic approach to the refugee problem Beyond Charity provides the first extensive overview of the world refugee crisis today asserting that refugees raise not only humanitarian concerns but also issues of international peace and security Gil Loescher argues persuasively that a central challenge in the post Cold War era is to develop a comprehensive refugee policy that preserves the right of asylum while promoting greater political and diplomatic efforts to address the causes of flight He presents the contemporary crisis in a historical framework and explores the changing role of the Office of the United Nations High Commissioner for Refugees Loescher suggests short term and long term reforms that address both the current refugee crisis and its underlying causes The book also details the ways governmental structures and international organizations could be strengthened to assume more effective assistance protection and political mediation functions Beyond Charity helps frame the debate on the global refugee crisis and offers directions for more effective approaches to refugee problems at present and in the future

People Forced to Flee Ninette Kelley, 2022 There are today some 60 million people who have fled their homes because of persecution and conflict This is the highest number ever recorded These people suffer exile that will likely last for years and even whole lifetimes both present and future The unprecedented scale and duration of forced displacement provide unsettling points of departure for the 2016 edition of *The State of the World's Refugees* Covering the years since 2012 this volume is the seventh in a series of flagship publications by the Office of the United Nations High Commissioner for Refugees UNHCR This book draws upon expert analysis as well as UNHCR's direct experience to shed light on the root causes and consequences of the current humanitarian and development crisis Its eleven chapters examine the world's evolving efforts to finance plan and

implement basic human rights protections amidst a recent spate of complex emergencies Updated data maps and case studies examine persistent challenges such as limited access to asylum abroad protection gaps at home for internally displaced persons the devastating consequences of statelessness and the troubling elusiveness of durable solutions This book also highlights the widespread impact of climate change as well as innovations in how humanitarian operations are designed and conducted Over 65 years after UNHCR was established A World in Turmoil reveals why its work remains more relevant and urgent than ever

People Forced to Flee United Nations High Commissioner for Refugees, 2022-02-16 People in danger have received protection in communities beyond their own from the earliest times of recorded history The causes war conflict violence persecution natural disasters and climate change are as familiar to readers of the news as to students of the past It is 70 years since nations in the wake of World War II drew up the landmark 1951 Convention relating to the Status of Refugees People Forced to Flee marks this milestone It is the latest in a long line of publications stretching back to 1993 that were previously entitled The State of the World's Refugees The book traces the historic path that led to the 1951 Convention showing how history was made by taking the centuries old ideals of safety and solutions for refugees to global practice It maps its progress during which international protection has reached a much broader group of people than initially envisaged It examines international responses to forced displacement within borders as well as beyond them and the protection principles that apply to both It reviews where they have been used with consistency and success and where they have not At times the strength and resolve of the international community seems strong yet solutions and meaningful solidarity are often elusive Taking stock today at this important anniversary is all the more crucial as the world faces increasing forced displacement Most is experienced in low and middle income countries and persists for generations People forced to flee face barriers to improving their lives contributing to the communities in which they live and realizing solutions Everywhere an effective response depends on the commitment to international cooperation set down in the 1951 Convention a vision often compromised by efforts to minimize responsibilities There is growing recognition that doing better is a global imperative Humanitarian and development action has the potential to be transformational especially when grounded in the local context People Forced to Flee examines how and where increased development investments in education health and economic inclusion are helping to improve socioeconomic opportunities both for forcibly displaced persons and their hosts In 2018 the international community reached a Global Compact on Refugees for more equitable and sustainable responses It is receiving deeper support People Forced to Flee looks at whether that is enough for what could and should help define the next 70 years

Refugees, the State and the Politics of Asylum in Africa James H. S. Milner,2009-11-06 How can we understand the plight of refugees in Africa Why are refugees now spending an average of 17 years in exile Why have African states required refugees to remain in isolated and insecure camps Is there a better approach to the needs of refugees in Africa This book answers these questions by examining the history and politics of asylum in Africa and the response of key African states to the mass arrival and prolonged presence of refugees By situating the question of refugees within the broader context of African politics the book outlines the broad range of factors that influence the asylum policies of African states Building from

these lessons the book outlines the politics of asylum in Africa and proposes a new approach to addressing the needs of the continent's refugees. This approach leads to important lessons not only for the study of asylum in Africa but also for the future of refugee protection in Africa.
