Heller, Rajan Madhok, Fabian Neuhaus, John Sandars, Sandra Sinfield, Upasana Gitanjali Singh, 2025-07-02 Higher education is in crisis Students are disengaged lecturers are burned out and universities seem more preoccupied with rankings and revenue than with knowledge and wellbeing But rather than dwell on the problems this book focuses on solutions on hope Bringing together a diverse range of educators and practitioners this collection showcases real world innovations that challenge the status quo and offer glimpses of a more humane and inspiring educational future From rethinking systems and curriculum design to fostering imaginative collaboration and exploring the role of technology the book highlights practical hopeful interventions that are already making a difference This is not a manifesto of complaints but an invitation to reimagine education The contributors offer fresh perspectives from around the world illustrating how small but meaningful changes can transform learning spaces empower educators and inspire students For academics teachers administrators and anyone invested in the future of education this book serves as both a source of inspiration and a call to action It is an evolving ecosystem of ideas grounded in practice rich with possibility and rooted in radical hope Now is the time to create the change we wish to see

Cross-Modal Learning: Adaptivity, Prediction and Interaction Jianwei Zhang, Stefan Wermter, Fuchun Sun, Changshui Zhang, Andreas K. Engel, Brigitte Röder, Xiaolan Fu, Gui Xue, 2023-02-02 The purpose of this Research Topic is to reflect and discuss links between neuroscience psychology computer science and robotics with regards to the topic of cross modal learning which has in recent years emerged as a new area of interdisciplinary research The term cross modal learning refers to the synergistic synthesis of information from multiple sensory modalities such that the learning that occurs within any individual sensory modality can be enhanced with information from one or more other modalities Cross modal learning is a crucial component of adaptive behavior in a continuously changing world and examples are ubiquitous such as learning to grasp and manipulate objects learning to walk learning to read and write learning to understand language and its referents etc In all these examples visual auditory somatosensory or other modalities have to be integrated and learning must be cross modal In fact the broad range of acquired human skills are cross modal and many of the most advanced human capabilities such as those involved in social cognition require learning from the richest combinations of cross modal information In contrast even the very best systems in Artificial Intelligence AI and robotics have taken only tiny steps in this direction Building a system that composes a global perspective from multiple distinct sources types of data and sensory modalities is a grand challenge of AI yet it is specific enough that it can be studied quite rigorously and in such detail that the prospect for deep insights into these mechanisms is quite plausible in the near term Cross modal learning is a broad interdisciplinary topic that has not yet coalesced into a

single unified field Instead there are many separate fields each tackling the concerns of cross modal learning from its own perspective with currently little overlap We anticipate an accelerating trend towards integration of these areas and we intend to contribute to that integration By focusing on cross modal learning the proposed Research Topic can bring together recent progress in artificial intelligence robotics psychology and neuroscience *Metaverse in Education: Opportunities and Challenges* Sajjad Hussain,Kathleen Meehan,Junaid Qadir,2024-04-30 **Electrical & Electronics Abstracts** ,1988 **New Age Journal** ,1988 **Electronics Now** ,1999-07 **Community, Technical, and Junior College Journal** ,1988 Bibliography of Agriculture ,1986 **Mastering Sora AI: 200+ Video Prompts and Workflow Recipes for Viral Content, Teaching, and Marketing** ReguReady, Unlock the full power of Sora AI with this ultimate prompt and workflow toolkit Sora is the most advanced AI video generator available today but most creators struggle with distorted faces warped hands and clumsy motion Why Because they don t know how to prompt Sora correctly This book fixes that Written like a cinematographer s playbook it gives you 200 detailed prompts crafted to produce professional stable and stunning AI videos Each includes camera angles lens choices lighting setups duration mood cues and stability locks everything you need to generate viral ready content in minutes Inside you ll find 200 Ready to Use Sora Prompts split into categories for storytelling marketing education wellness social media and more Step by Step Workflows learn how to turn one prompt into a week of TikToks Reels or YouTube Shorts Cheat Sheets Quick Wins 10 starter prompts export hacks and fixes for common mistakes Monetization Guide discover how to sell Sora content on TikTok YouTube Etsy Gumroad and other platforms For Everyone whether you re a teacher saving hours on lessons a marketer creating ads or a creator building an audience Written by Lizet Swanepoel author of the best selling AI Prompt Library for Teachers and AI Classroom Companion for Teachers this guide gives you the insider system to master Sora AI save time and turn your creativity into income Stop wasting time on bad prompts Start creating viral videos with Sora today *Creating Video for Teachers and Trainers* Timothy W Spannaus,2012 *Creating Video for Teachers and Trainers* This practical resource will help teachers and trainers produce professional quality training videos even while using less than professional quality equipment and software Author Timothy Spannaus shows how to use professional techniques with consumer grade equipment to produce videos that work and tell the intended story minimizing defects that get in the way of improving learning and performance The end result is a video that can be used in classroom or labs distributed on the web packaged for use in learning management systems or shared on social media sites Praise for *Creating Video for Teachers and Trainers* This is a practical immediately usable resource filled with concrete and creative ideas and tips For those of us wanting to know how to plant our feet and not stumble when venturing into designing and making great videos it s a godsend Len Scrogan digital learning architect Future Talk Blog The perfect roadmap for instructional professionals new to video production Includes evidence based guidelines on the when why and how of video for training purposes Ruth Clark president Clark Training and Consulting In my 20 plus years
