## **Coping Strategies In The North Local Practices In The Context Of Global Restructuring:**

The Reflexive North Nils Aarsæther, Jørgen Ole Bæreholdt, 1998 227 s hf INS 1998 303      **Mobilising Place**

**Management** Claus Lassen, Lea Holst Laursen, 2020-11-12 Mobilising Place Management makes an important contribution to the mobilities field by arguing for the need to rethink place management. It takes a point of departure in the mobilities turn and relational place thinking while exploring the relationship between place and mobility. In a world of increasing mobility and global competition between nations, cities and urban regions, the managing of places seems more relevant than ever before. By examining various examples of place and mobilities that range from the airport rural village tourist site port city to the city region, this book argues that the management of places can be informed and enhanced by installing a greater awareness and understanding of mobility. This insight could potentially improve the ability of current place management to translate a relational and mobilities orientated thinking into concrete actions, instructions, interventions, designs, plans, policies and management control systems. The book will be essential reading for researchers, practitioners and students in the field of place management and across urban studies, planning, design, geography, sociology, tourism, transport and history.      *Mapping Worlds* Rob Kitchin, 2013-09-13 Social and cultural geography is practised by geographers from around the world. However, for various reasons including language and publishing traditions, knowledge of the research being undertaken can often remain confined to those working within those countries. This book draws together for the first time into one volume reports of social and cultural geography undertaken in several countries from around the world. It provides an important overview of geographic ideas and traditions and the history of human geography more generally, allowing comparison between countries and details of key studies and references. As such, the book will be of interest to geographers schooled in different national traditions and those interested in the production and history of geographic knowledge. Entries are written in both English and the country's own national language.      Social Research Methods Nicholas Walliman, 2015-12-03 Nicholas Walliman is the supervisor in your students' pockets, making sure they understand all the essential methods for successfully carrying out a research project and negotiating the challenges and pitfalls. In this book, he takes students step by step through the research process. Helps them formulate clear aims and objectives. Explains all the vocabulary to understand the A-Z of research methods. Ends each chapter with a reading guide for taking learning further with more resources to help get a deeper understanding of the issues discussed. Improves research reports with practical advice on presenting findings in great tables, graphs and diagrams. Opens his office door with reflective questions and answers. Delivers the confidence to get started and get finished. **Social Research Methods: The Essentials** is the perfect starting point and guide for your students' research project.      **Value Chains and Resilient Coastal Communities in the Nordic Atlantic** Hovgaard, Gestur, Bæreholdt, Jørgen Ole, Lebel, Julien, Bjørkan, Maiken, Kassahun Temesgen, Amsale, Eyþórsson, Grétar Þór, Þorgrímsdóttir, Sigríður K., Bogadóttir, Ragnheiður, Gaini, Firouz, Nyman Larsen, Joan, Ingimundarson, Jón Haukur, 2022-12-19 Available online <https://www.researchgate.net/publication/364888888>

pub norden.org/temanord2022-555 This report presents new and updated knowledge about Nordic coastal communities and their socio-economic situation. We investigate key structures and value chains in eight coastal communities in Greenland, Iceland, the Faroes, and Norway. The report highlights local variations in the interaction between value chains and local resilience and provides a comparative perspective. The report uncovers new trends and important development characteristics for Nordic coastal communities with diversification, continued household-based activities, and person-specific factors found to be key for success in business life and for resilience at the local level. Our results also call into question some of the challenges and conventional truths facing coastal community development in a period where solutions are being sought for sustainability and the climate challenge.

Le Sourou est une modeste vallée alimentée en eau par la défluence du Mouhoun qui fait d'elle un vaste réservoir facilement aménageable. Cette région est devenue l'enjeu et le modèle de la Révolution socialiste initiée par Thomas Sankara en 1983. Le changement de régime les détournera de leur finalité initiale en passant d'une économie socialiste à un système libéral. L'analyse de la situation actuelle permet de saisir sur une superficie limitée l'essentiel des problèmes qui se posent dans les pays du Sahel africain et la capacité de la paysannerie africaine à rechercher et trouver des compromis entre tradition et modernité.
