Globalization John Glenn, 2012-08-06 Rather than claim that there exists a common concept of globalization that all parties can agree to this book seeks to examine some of the conceptions and the way in which they render different interpretations of particular aspects of globalization The last two decades have witnessed an explosive proliferation of academic writings on the subject of globalization which has been accompanied by a high level of interest in the media and widespread usage of the term This has inevitably resulted in the meaning of the concept broadening to include a whole host of issues running the attendant risk of losing any conceptual focus it had John Glenn examines five issue areas affected by globalization the economy sovereignty civil society governance communication In so doing the book aims to articulate certain questions within each area which will allow for some judgment to be made concerning the differing perspectives on globalization Globalization will be of interest to students of international political economy and politics and international relations in general

The Logic of Pre-electoral Coalition Formation Sona Nadenichek Golder, 2006 Why do some parties coordinate their

electoral strategies as part of a pre electoral coalition while others choose to compete independently at election time. Scholars have long ignored pre electoral coalitions in favor of focusing on the government coalitions that form after parliamentary elections. Yet electoral coalitions are common; they affect electoral outcomes and they have important implications for democratic policy making itself. *The Logic of Pre Electoral Coalition Formation* by Sona Nadenichek Golder includes a combination of methodological approaches: game theoretic, statistical and historical, to explain why pre electoral coalitions form in some instances but not in others. The results indicate that pre electoral coalitions are more likely to form between ideologically compatible parties. They are also more likely to form when the expected coalition size is large but not too large and when the potential coalition partners are similar in size. Ideologically polarized party systems and disproportional electoral rules in combination also increase the likelihood of electoral coalition formation. Golder links the analysis of pre electoral coalition formation to the larger government coalition literature by showing that pre electoral agreements increase a) the likelihood that a party will enter government, b) the ideological compatibility of governments and c) the speed with which governments take office. In addition, pre electoral coalitions provide an opportunity for combining the best elements of the majoritarian vision of democracy with the best elements of the proportional vision of democracy.

Canadian Politics James Bickerton, Alain Gagnon, 2009-01-01. The new fifth edition of *Canadian Politics* continues the work of earlier editions in offering a comprehensive introduction to Canadian government and politics by a widely recognized and highly respected group of political scientists writing about subjects on which they are acknowledged experts. For this edition the editors have organized the book into four sections: Part I: Citizenship, Identities and Values; Part II: Institutions; Part III: Democracy and Representation; and Part IV: Canada in the World. The fourth section develops a focus on the diverse and increasingly important influences of globalization on the Canadian polity, the environment and the role of Canada in the world. Of the eighteen chapters, nine are completely new and six new authors appear, including Martin Papillon on Aboriginal governments.

Peter J Stoett on Canadian international environmental policy and Andrew F Cooper on Afghanistan and Canadian foreign policy The remaining chapters have been thoroughly revised and updated *Six Essays on Global Order and Governance* Harto Hakovirta,2003 **The Governance of Globalisation** Pontificia Accademia delle scienze sociali. Plenary Session,2004 **Globalization and Politics in India** Baldev Raj Nayar,2007 Contributed articles on the consequences of globalization and the associated process of economic liberalization in India **Globalization** Robert Goehlert,2003 The Politics of Profit Jenny Rebecca Kehl,2003 **Index Islamicus** ,2003 **Social Science Review** ,2007-06 **The Determinants of Currency Crises** B. Rother,2009-04-17 A lot of research has been carried out on currency crises but the existing literature largely fails to adequately recognize the role of politics in creating financial turbulence This book explains the role of political factors in the occurrence of currency crises It starts out with a discussion of political developments in four prominent crisis cases including Turkey and Argentina in the early 2000s before discussing various extensions of a workhorse model of the economics literature two of which are original to show how upcoming elections intra governmental conflict and lobbying activity can impact the stability of an exchange rate regime The econometric analysis uses a diverse sample of 69 countries over 1975 97 to determine whether the inclusion of political variables can make a difference in crisis prediction without adding too much complexity compared with standard early warning systems models that rely exclusively on macroeconomic fundamentals This book provides a thorough and in depth report seeking to translate concepts from the discipline of political science into the language of economics It is essential reading for all interested in international political economy and financial crises *Choice* ,2002 *India's Globalization* Baldev Raj Nayar,2006 Instead of denationalization business in India is now more competitive and is venturing forth into the global market increased imports and the entry of foreign multinationals have not swamped it essentially India is master of its own destiny Instead of economic destabilization there has been since the paradigm shift in economic policy in 1991 a marked absence of economic crisis in India And instead of impoverishment India has seen a long and unprecedented period of welfare enhancement since it began its reintegration into the world economy in 1975 there has been a secular decline in poverty since then while inequality has not increased much The policy conclusion that flows from this experience is that India ought to be in general more open to globalization in the interest of sustaining the acceleration in economic growth and enhancing the welfare of its people To this end it should push forward with the reform agenda **Futures** Institute for the Future,2004 *Contemporary Southeast Asia* ,2003
