

BITES AND STINGS

The source of a bite or sting is often unknown. Most injuries will cause a little pain, itching, localized swelling, and some redness and discomfort. However, stings sometimes cause an intense allergic response known as anaphylaxis, particularly when a bee is involved. This condition is life-threatening, with a grave risk if treatment is not commenced promptly (see pp.50-51).

Immediate treatment of bites and stings

If collapsed, difficulty breathing, a large bite, remove casualty from water and treat as above.

Stings

- Avoid the stings or tentacles - use gloves.
- The sting area can be covered with vinegar or bicarbonate, but this may make envenomation and pain worse.
- Cover the area with shaving cream, fluid, or sand/seawater paste, and scrape a little across to remove stingers - this avoids any further envenomation.
- Soak the area in very warm seawater (as warm as tolerated) for 60-90 minutes. This will encourage the breakdown of venom in the skin.
- Thoroughly wash the area, and put sterile dressings on wounds.
- For itching - oral antihistamine (terfenadine or cetirizine).
- For inflammation - hydrocortisone 1% cream is effective.
- For infection - apply fusidic acid 2% cream 2-3 times a day.

See pp.50-51

See pp.32-33

Bites and penetrating wounds

- Wash the wound thoroughly with soap and hot water (sterile if possible).
- Remove embedded spines if possible. DO NOT remove large spines (such as those from a stingray) from the chest, head, neck, or abdomen - bleeding may worsen.
- Stop bleeding with direct pressure (as warm as tolerated) for 60-90 minutes.
- Cover wound with sterile dressing and check daily for infection.
- Start broad spectrum antibiotics (amoxicillin + clavulanic acid or ciprofloxacin).
- Check tetanus status and availability of an antivenom.

Prevention

- Wear shoes at all times and don't walk barefoot in shallow water.
- Do not touch unknown animals or coral.
- Wear shorts at all times and don't walk barefoot in shallow water.
- Do not harass animals at any time.
- Make sure tetanus vaccination is up-to-date.
- Carry antivenom in high risk areas.
