**Enterprise Security with EJB and CORBA** Bret Hartman,Donald J. Flinn,Konstantin Beznosov,2002-03-14 Building secure applications using the most popular component technologies Did you know that most corporate computer security breaches are inside jobs by trusted employees This book addresses the need in the era of multi tier systems to implement security solutions across all enterprise applications not just firewalls that target intrusion from the outside With nationally recognized CORBA security experts Bret Hartman Donald J Flinn and Konstantin Beznosov this book shows application developers how to build secure real world applications that deliver tightly integrated security at all system levels using the latest component technologies and tools Coverage also includes a sample e commerce system built using Java with EJB and CORBA as well as case studies of implementations in finance manufacturing and telecom Computer Security John S. Potts,2002 We live in a wired society with computers containing and passing around vital information on both personal and public matters Keeping this data safe is of paramount concern to all Yet not a day seems able to pass without some new threat to our computers Unfortunately the march of technology has given us the benefits of computers and electronic tools while also opening us to unforeseen dangers Identity theft electronic spying and the like are now standard worries In the effort to defend both personal privacy and crucial databases computer security has become a key industry A vast array of companies devoted to defending computers from hackers and viruses have cropped up Research and academic institutions devote a considerable amount of time and effort to the study of information systems and computer security Anyone with access to a computer needs to be aware of the developing trends and growth of computer security To that end this book presents a comprehensive and carefully selected bibliography of the literature most relevant to understanding computer security Following the bibliography section continued access is provided via author title and subject indexes With such a format this book serves as an important guide and reference tool in the defence of our computerised culture

Computational Science — ICCS 2001 Vassil N. Alexandrov,Jack J. Dongarra,Benjoe A. Juliano,Rene S. Renner,C.J.Kenneth Tan,2003-05-15 LNCS volumes 2073 and 2074 contain the proceedings of the International Conference on Computational Science ICCS 2001 held in San Francisco California May 27 31 2001 The two volumes consist of more than 230 contributed and invited papers that reflect the aims of the conference to bring together researchers and scientists from mathematics and computer science as basic computing disciplines researchers from various application areas who are pioneering advanced application of computational methods to sciences such as physics chemistry life sciences and engineering arts and humanitarian fields along with software developers and vendors to discuss problems and solutions in the area to identify new issues and to shape future directions for research as well as to help industrial users apply various advanced computational techniques **CORBA Security** Bob Blakley,2000 Blakely an information security architect for IBM s Software Solutions describes the challenge of object security in detail and shows how COBRA s object security standard can be implemented

through practical readable instructions      Component-Based Software Engineering George Heineman, Ivica Crnkovic, Heinz W. Schmidt, Judith A. Stafford, Clemens Szyperski, Kurt Wallnau, 2005-04-28 On behalf of the Organizing Committee I am pleased to present the proceedings of the 2005 Symposium on Component Based Software Engineering CBSE CBSE is concerned with the development of software intensive systems from reusable parts components the development of reusable parts and system maintenance and improvement by means of component replacement and componentization CBSE 2005 Software Components at Work was the eighth in a series of events that promote a science and technology foundation for achieving predictable quality in software systems through the use of software component technology and its associated software engineering practices We were fortunate to have a dedicated Program Committee comprised of 30 internationally recognized researchers and industrial practitioners We received 91 submissions and each paper was reviewed by at least three Program Committee members four for papers with an author on the Program Committee The entire reviewing process was supported by CyberChairPro the Web based paper submission and review system developed and supported by Richard van de Stadt of Borbala Online Conference Services After a two day virtual Program Committee meeting 21 submissions were accepted as long papers and 2 submissions were accepted as short papers      **A Practical Guide to Testing Object-oriented Software** John D.
