we aim to show readers in greater detail how women may present with particular conditions and demonstrate what should take place in the way of consultation investigations and treatment. However, by questioning our readers as we go along, we also hope to encourage them to think about why they would choose a certain clinical course of action and to base their decisions firmly on current scientific evidence. In addition to the purely clinical aspects of the cases, the emotional, social and psychological aspects of the care of each woman is described. Each of the 50 case histories commences with a straightforward description following a woman through the clinical presentation of a particular condition. Along the way, important points in clinical examination and diagnosis, complications, investigations and management are incorporated into the text as a conversation with the reader and essential points are highlighted in boxes. Being an Australian author, team tips are included for those junior doctors faced with obstetric or gynaecological problems in a smaller metropolitan or rural setting. Facilities for care and the advice of senior practitioners may be more limited in such surroundings and different care paths may be more appropriate, especially in remote parts of Australia. An app with multiple choice questions is available through the App Store and Google Play.
