The Proceedings of the Maya Hieroglyphic Workshop ,1998 *The Adorned Body* Nicholas Carter,Stephen D.

Houston,Franco D. Rossi,2020-09-01 How we dress our bodies through clothing footwear headgear jewelry haircuts and more is key to the expression of status and identity This idea was as true for ancient Maya civilization as it is today yet few studies have centered on what ancient Maya peoples wore and why In *The Adorned Body* Nicholas Carter Stephen Houston and Franco Rossi bring together contributions from a wide range of scholars leading to the first in depth study of Maya dress in pre Columbian times Incorporating artistic hieroglyphic and archaeological sources this book explores the clothing and ornaments of ancient Maya peoples systematically examining who wore what deducing the varied purposes and meanings of dress items and larger ensembles and determining the methods and materials with which such items were created Each essay investigates a category of dress including headgear pendants and necklaces body painting footwear and facial ornaments and considers the variations within each of these categories as well as popular styles and trends through time The final chapters reveal broader views and comparisons about costume ensembles and their social roles Shedding new light on the art and archaeology of the ancient Americas *The Adorned Body* offers a thorough map of Maya dress that will be of interest to scholars and fashion enthusiasts alike

The Maya Calendar Weldon Lamb,2017-02-23 By 1 800 years ago speakers of proto Cholan the ancestor of three present day Maya languages had developed a calendar of eighteen twenty day months plus a set of five days for a total of 365 days This original Maya calendar used extensively during the Classic period 200 900 CE recorded in hieroglyphic inscriptions the dates of dynastic and cosmological importance Over time and especially after the Mayas contact with Europeans the month names that had originated with these inscriptions developed into fourteen distinct traditions each connected to a different ethnic group Today the glyphs encompass 250 standard forms variants and alternates with about 570 meanings among all the cognates synonyms and homonyms In *The Maya Calendar* Weldon Lamb collects defines and correlates the month names in every recorded Maya calendrical tradition from the first hieroglyphic inscriptions to the present an undertaking critical to unlocking and understanding the iconography and cosmology of the ancient Maya world Mining data from astronomy ethnography linguistics and epigraphy and working from early and modern dictionaries of the Maya languages Lamb pieces together accurate definitions of the month names in order to compare them across time and tradition His exhaustive process reveals unsuspected parallels Three fourths of the month names he shows still derive from those of the original hieroglyphic inscriptions Lamb also traces the relationship between month names as cognates synonyms or homonyms and then reconstructs each name s history of development connecting the Maya month names in several calendars to ancient texts and archaeological finds In this landmark study Lamb s investigations afford new insight into the agricultural astronomical ritual and even political motivations behind names and dates in the Maya calendar A history of descent and diffusion of unexpected connectedness and longevity *The Maya Calendar*

offers readers a deep understanding of a foundational aspect of Maya culture

The Memory of Bones Stephen Houston, David Stuart, Karl Taube, 2006-06-01 All of human experience flows from bodies that feel express emotion and think about what such experiences mean But is it possible for us embodied as we are in a particular time and place to know how people of long ago thought about the body and its experiences In this groundbreaking book three leading experts on the Classic Maya ca AD 250 to 850 marshal a vast array of evidence from Maya iconography and hieroglyphic writing as well as archaeological findings to argue that the Classic Maya developed a coherent approach to the human body that we can recover and understand today The authors open with a cartography of the Maya body its parts and their meanings as depicted in imagery and texts They go on to explore such issues as how the body was replicated in portraiture how it experienced the world through ingestion the senses and the emotions how the body experienced war and sacrifice and the pain and sexuality that were intimately bound up in these domains how words often heaven sent could be embodied and how bodies could be blurred through spirit possession From these investigations the authors convincingly demonstrate that the Maya conceptualized the body in varying roles as a metaphor of time as a gendered sexualized being in distinct stages of life as an instrument of honor and dishonor as a vehicle for communication and consumption as an exemplification of beauty and ugliness and as a dancer and song maker Their findings open a new avenue for empathetically understanding the ancient Maya as living human beings who experienced the world as we do through the body

Ancient Maya Politics Simon Martin, 2020-06-18 The Classic Maya have long presented scholars with vexing problems One of the longest running and most contested of these and the source of deeply polarized interpretations has been their political organization Using recently deciphered inscriptions and fresh archaeological finds Simon Martin argues that this particular debate can be laid to rest He offers a comprehensive re analysis of the issue in an effort to answer a simple question how did a multitude of small kingdoms survive for some six hundred years without being subsumed within larger states or empires Using previously unexploited comparative and theoretical approaches Martin suggests mechanisms that maintained a dynamic equilibrium within a system best understood not as an array of individual polities but an interactive whole With its rebirth as text backed historical archaeology Maya studies has entered a new phase one capable of building a political anthropology as robust as any other we have for the ancient world

The Maya World Scott R. Hutson, Traci Ardren, 2020-06-17 The Maya World brings together over 60 authors representing the fields of archaeology art history epigraphy geography and ethnography who explore cutting edge research on every major facet of the ancient Maya and all sub regions within the Maya world The Maya world which covers Guatemala Belize and parts of Mexico Honduras and El Salvador contains over a hundred ancient sites that are open to tourism eight of which are UNESCO World Heritage Sites and many thousands more that have been dug or await investigation In addition to captivating the lay public the ancient Maya have attracted scores of major interdisciplinary research expeditions and hundreds of smaller projects going back to the 19th century making them one of the best known

Animals and their Relation to Gods, Humans and Things in the Ancient World Raija Mattila, Sanae Ito, Sebastian Fink, 2019-03-11 While Human Animal Studies is a rapidly growing field in modern history studies on this topic that focus on the Ancient World are few The present volume aims at closing this gap It investigates the relation between humans animals gods and things with a special focus on the structure of these categories An improved understanding of the ancient categories themselves is a precondition for any investigation into the relation between them The focus of the volume lies on the Ancient Near East but it also provides studies on Ancient Greece Asia Minor Mesoamerica the Far East and Arabia

Continuity and Change in Text and Image at Chichén Itzá, Yucatán, Mexico Erik Boot, 2005 The archaeological site of Chich n Itz one of the best known ancient Maya cities is located in the northern section of the Yucat n peninsula in Mexico Chich n Itz has figured prominently in both past and present discussions on the Terminal Classic and Early Postclassic periods in the northern Maya lowlands Based on archaeological information and information derived from ethnohistorical sources this city can be dated to a period from circa A D 700 to circa A D 1250 with its apogee placed between about A D 800 to A D 1050 The past and present discussions were directed specifically towards the origin of the inhabitants of the city the arrival of K uk ulk n Feathered Serpent the origin of non Mayan Toltec architecture and sculptural programmes at the site and the model of its political organization The centre of Chich n Itz is dominated by a raised platform which harbours buildings now known as El Castillo The Castle the Great Ballcourt and the Temple of the Warriors These buildings contain various non Mayan architectural and sculptural traits Buildings south of the centre erected in a regional Maya style contain a large number of inscribed monuments mostly lintels carrying long

hieroglyphic texts which provide Chich n Itz with the largest corpus of surviving inscriptions in the northern Maya lowlands Chich n Itz figures prominently in a wide range of ethnohistorical sources from the Colonial period such as the Relaci n de las Cosas de Yucat n by Fray Diego de Landa and the Relaciones Geogr ficas by various authors all in Spanish and the so called Books of Chilam Balam of Chumayel Man and Tizim n all in Yucatec Maya In this study Erik Boot discusses the southern Maya lowland origin of the inhabitants of Chich n Itz the arrival of K uk ulk n and the introduction of so called Toltec architecture and iconography the identification of both gods and human beings in the inscriptions and the political organization at Chich n Itz He presents extensive and detailed analyses of architectural and sculptural programmes hieroglyphic inscriptions and the Yucatec Maya chronicles from the Books of Chilam Balam *Nasal Motifs in Maya Iconography* Harri Kettunen,2006 *Paperbound Books in Print* ,1992 **The Terminal Classic in the Maya Lowlands** Arthur Andrew Demarest,Prudence M. Rice,Don S. Rice,2005 The Terminal Classic in the Maya Lowlands revisits one of the great problems in Mayan archaeology the apparent collapse of Classic Maya civilization from roughly A D 830 to 950 During this period the Maya abandoned their power centers in the southern lowlands and rather abruptly ceased the distinctive cultural practices that marked their apogee in the Classic period Archaeological fieldwork during the past three decades however has uncovered enormous regional variability in the ways the Maya experienced the shift from Classic to Postclassic society revealing a period of cultural change more complex than acknowledged by traditional models Featuring an impressive roster of scholars The Terminal Classic presents the most recent data and interpretations pertaining to this perplexing period of cultural transformation in the Maya lowlands Although the research reveals clear interregional patterns the contributors resist a single overarching explanation Rather this volume s diverse and nuanced interpretations provide a new more properly grounded beginning for continued debate on the nature of lowland Terminal Classic Maya civilization **The Hieroglyphic Stairway 1 at Edzna, Campeche, Mexico** Karl Herbert Mayer,2004 **Res** ,1983 [Book Review Index](#) ,1985 Every 3rd issue is a quarterly cumulation
